

Best oral presentation award 2012

VLIZ Young Marine Scientists' Day

KHBO, Brugge (24 February 2012)

Kindly find below the alphabetical list of the oral 'pitching' presentations, tick your **top three** and turn in the form when leaving the plenary session room at **12:10**.

	Blommaert Lander Light stress in intertidal diatoms: a comparative molecular and ecophysiological study
	Derweduwen Jozefien Do windmill parks function as a refugium?
	Ghyselen Céline Reduced seed set by root herbivory in a coastal dune plant: are pollinators involved?
	Huysman Marie J.J. Unravelling the light-dependent cell cycle onset in diatoms
	Matola Hakimu Davis The feeding ecology of four semi-pelagic fish species in the North Sea: a case of Belgian water
	Meire Alexander Estimating primary production from continuous oxygen data in the Schelde Estuary
	Merken Ronny Wetland suitability and connectivity for migratory birds along the Ionian Flyway in Greece
	Olendo Mike Can the Kiunga MPA protect the Lamu fishery?
	Sotillo Alejandro Seabirds and fishery discards in the Southern North Sea
	Stratigaki Vasiliki Large scale experiments on farms of heaving wave energy converters
	Teuchies J. The effect of increasing surface water oxygen concentrations on metal mobility in sediments from the Schelde estuary
	Thieren Els The former occurrence of sturgeon in the North Sea - The contribution of archaeozoology and ancient DNA
	Van Cauwenberghe Lisbeth Selective uptake of microplastics by a marine bivalve (<i>Mytilus edulis</i>)
	Van Hoey Gert Dredged material disposal: does it substantially affect the ecosystem?
	Vandegheuchte Michiel Plastic waste in the Belgian coastal waters: where and how much?
	Vandenbohede Alexander Groundwater quality distribution in the Belgian coastal plain: a story of Holocene transgression and human intervention
	Vanlede Joris Salinity in the Belgian coastal zone
	Vanmaele Sofie Aquaculture and immunostimulation through the eyes of <i>Artemia</i>
	Veale William Reducing overtopping risks in Belgian coastal towns
	Verhaegen Yves Did the use of TBT-based antifouling paints cause severe damage to the common shrimp (<i>Crangon crangon</i>) population of the Southern Bight?
