„The number of species described by authors who cannot determine their affinities increases annually, and I regard the naturalist who puts a described plant into its proper position in regard to its allies as rendering a greater service to science than its describer when he either puts it into a wrong place or throws it into any of these chaotic heaps, miscalled genera, with which systematic works still abound.“

Sir JOSEPH DALTON HOOKER (1875)
„The Flora of British India.“

Aktualisierte Liste der terrestrischen Gastropoden Thailands.

von

59023

JENS HEMMEN und CHRISTA HEMMEN
Wiesbaden.

Summary: After SUVATTI (1938, 1950) and PANHA (1996), who only treated the Pulmonata, an actual list of the terrestrial Gastropoda of Thailand is presented. The literature up to 2001 has been taken into account. The compilation is completed by a bibliography of the land-, brackish and freshwater-molluscs of Thailand and Myanmar (former Burma).

Zusammenfassung: Nach SUVATTI (1938, 1950) und PANHA (1996), der allerdings nur die Land-Pulmonaten behandelte, wird eine aktualisierte Liste der terrestrischen Gastropoden Thailands vorgelegt. Die Literatur bis 2001 findet Berücksichtigung. Die Zusammenstellung wird ergänzt durch eine Bibliographie der Land-, Brack- und Süßwasser-Mollusken Thailands und Myanmars (früher Burma).

Einleitung

Erstmals erschien im Jahre 1938 eine Zusammenstellung der "Molluscs of Siam" von SUVATTI. Der gleiche Autor veröffentlichte 1950 eine erweiterte Liste ("Fauna of Thailand, Mollusca."). Eine ausführliche Bearbeitung der Süß- und Brackwasser-Mollusken – mit zahlreichen Neubeschreibungen – publizierte BRANDT 1974. Die bisher aktuellste Aufstellung, allerdings nur der terrestrischen Pulmonaten, stammt von PANHA aus dem Jahre 1996. Diese enthält zahlreiche Fehler und leider gibt der Autor keine Veröffentlichungs-Daten für die aufgeführten Arten an.

Im Rahmen der Bearbeitung umfangreicher eigener Aufsammlungen von Landgastropoden aus Südthailand, ergab sich die Möglichkeit, eine neue Liste vorzulegen, die dem oben erwähnten Mangel abhilft und auch die terrestrischen Prosobranchier beinhaltet.

Aus dem 19. Jahrhundert stammen nur wenige Arbeiten (GODWIN-AUSTEN, MOELLENORFF, MORELET, MORLET, L. PFEIFFER...), die sich mit der Landschnecken-Fauna Thailands beschäftigen. Die Zahl solcher Publikationen wuchs im 20. Jahrhundert beträchtlich, woran vor allem folgende Autoren massgeblich beteiligt waren: BENTHEM-JUTTING, BLANFORD, VAN BRUGGEN, COLLINGE, FULTON, GODWIN-AUSTEN, GUDE, HAAS, LAIDLAW, SOLEM, TOMLIN, TWEEDIE, ZILCH. Ab 1996 erschienen vornehmlich Neubeschreibungen von PANHA selbst und THOMPSON & UPATHAM. Der Norden Thailands ist weitgehend terra incognita, während der Westen, durch die Forschungen im Grenzgebiet zu Myanmar, recht gut bearbeitet wurde, ebenso wie die südlichsten Provinzen, in denen um die Wende vom 19. zum 20. Jahrhundert durch die britische SKEAT-Expedition Aufsammlungen durchgeführt wurden.

Die Abgrenzung des geographischen Begriffs Thailand gestaltet sich – ebenso wie bei vielen anderen Ländern Südasiens – als sehr schwierig, da der Grenzverlauf häufig wechselte. Im vorliegenden Fall trifft das insbesondere für die Grenzziehung Thailand/Myanmar (früher Burma) zu. (Die Bibliographie umfasst daher neben Veröffentlichungen über Thailand auch solche über Myanmar.)

Die Zusammenstellung wird ergänzt durch eine Reihe von Anmerkungen.

Dank:

Unser Dank gilt Herrn Dr. JOCHEN GERBER, Field Museum of Natural History, Chicago, USA; Herrn Dr. RONALD JANSSEN, Forschungs-Institut Senckenberg, Frankfurt/Main; Herrn WIM MAASSEN, Nationaal Natuurhistorisch Museum, Leiden, The Netherlands; Herrn HARTMUT NORDSIECK, Aarbergen-Rückershausen; Herrn Dr. VOLLRATH WIESE, Haus der Natur, Cismar; den Mitarbeitern der Hessischen Landesbibliothek, Wiesbaden.

Alle Fotos wurden von Dr. V. WIESE angefertigt.

 Thailand, rubber plantation near road # 401,
 22 mm; leg. HEMMEN, HNC 57344

Anmerkungen

Anmerkung 15: PANHA (1996: 35) bezeichnet die Art fälschlich als *laevis*.

Anmerkung 16: Dieses Taxon wird von PANHA (1995: 34) sowohl in der Gattung *Hemiplecta* als auch *Dyakia* genannt.

Anmerkung 17: CHANG (1997: 10) schreibt den Artnamen falsch "retrosa".

Anmerkung 18: In seiner Beschreibung der neuen Art vergleicht PANHA diese durchgängig mit *Nanina (Macrochlamys) diadema*! Er bezeichnet sie (1997c: 124) auch als *Syama diadema*. Auch ABBOTT (1989: 23, 133) benutzt den Gattungsnamen *Syama*. Nach ZILCH (1959: 325) sind die Gehäuse dieser Gattung jedoch "...fast glatt oder mit äußerst feinen, körnigen Spirallinien...". SOLEM (1966: 28) bemerkt dazu: „*Syama* BLANFORD and GODWIN-AUSTEN 1908 differs from *Macrochlamys* only in lacking the dart apparatus, a character of doubtful generic value.....“

Anmerkung 19: DALL (1897: 38) beschrieb *Nanina (Macrochlamys ?) diadema* von "Prang". Dieser Ort konnte bisher leider nicht lokalisiert werden. Wir vermuten, dass es sich um einen Druckfehler für "Trang" handelt, 1902 (Taf. 27, Abb. 1-3) bildet der gleiche Autor die Art erstmals ab und wiederholt die o.a. Fundortangabe. (Im Thailändischen bedeutet das Wort "Prang" einen schmalen, an der Spitze abgerundeten Turm, insbesondere bei Khmer-Bauwerken.)

Gehäuse und wenige lebende Exemplare, die der Beschreibung entsprechen, konnten an verschiedenen Lokalitäten in Südthailand in den Provinzen Phang Nga, Krabi und Suratthani nachgewiesen werden.

Anmerkung 20: PANHA (1996: 35) platziert die Art in der Gattung *Naninia*.

Anmerkung 21: Die Art wird von PANHA (1996: 34) in die Gattung *Cryptozona* gestellt.

Anmerkung 22: Die Art wird von PANHA zweimal aufgeführt, fälschlich in der Familie Helixarionidae als *Helixarion* (1996: 33), richtig in Ariophantidae als *Megaustenia* (1996: 34).

Laut ZILCH (1959: 309) sind die Gattung *Helixarion* und alle Untergattungen nur auf den Pazifischen Inseln und Australien verbreitet.

Anmerkung 23: In der Liste von PANHA (1995: 35) erscheint *Minyongia kempii* GODWIN-AUSTEN. Diese 1916 beschriebene Art ist nur von Indien bekannt (SOLEM [1966: 67]).

Anmerkung 24: Ausser *fruhstorferi* findet sich bei PANHA (1996: 35) noch *Myotesta punctata* COLLINGE 1901. Diese Art ist aber nur von Tonkin bekannt (SOLEM [1966: 67]).

Anmerkung 25: PANHA (1996: 34) nennt *Parmarion setchuanensis* [sic!] HEUDE. SOLEM (1966: 66) schreibt zu dieser Art: „There is no description of the internal anatomy and no indication of the size. This [*Parmarion setchuanensis* HEUDE 1885] is another meaningless name.“

Anmerkung 26: ZILCH (1959: 314) charakterisiert die Gattung *Quantula* "Gehäuse linksgewunden". Abbildung 1145 zeigt ein [richtig!] rechtsgewundenes Exemplar.

Anmerkung 27: Von PANHA (1995: 34) wird die Art in die Gattung *Dyakia* gestellt.

Anmerkung 28: Die Art findet sich bei PANHA (1996: 34) in der Gattung *Macrochlamys*.

Anmerkung 29/30: Die Gattungen *Sesara* und *Sivella* mit *S. castra* werden von PANHA (1996: 33) in der Familie Helicarionidae geführt.

Anmerkung 31: YEN (1939: 157) beschrieb *Macrocyclus crenulata* (Familie Rhytididae) von Hongkong. SOLEM (1966: 41) schlägt vor, diese Art und *Macrocyclus contempta* BAVAY & DAUTZENBERG 1909 von Tonkin der Gattung *Teraia* zuzuordnen, da sie mit dieser von den Gehäusen her übereinstimmen und vom asiatischen Festland keine Rhytididen bekannt sind.

Anmerkung 32: PANHA (1996: 35) stellt *B. cambodjensis* [sic!] in die Familie Zonitidae.

Anmerkung 33: In der Beschreibung von *A. tanyai* bemerkt PANHA (S. 131) "Amphidromus is represented in Thailand by 17 species." SOLEM (1965) gibt dagegen nur 9 Arten an, von denen er eine für zweifelhaft hält.

Anmerkung 34: PANHA (1996: 36) stellt das Taxon als *Bradybaena* in die falsche Familie.

Anmerkung 35: Diese Art wird von PANHA (1996: 36) als *Chloritis platytrapis samuiana* MÖLLENDORFF angegeben.

Anmerkung 36: PANHA (1996: 36) führt diese Art fälschlich nochmals als *Bradybaena fouresi* auf.

Anmerkung 37: PANHA (1996: 36) verwendet das Synonym *Ganesella perakensis* CROSSE.

Anmerkung 38: Zusätzlich nennt PANHA (1996: 36) noch *Ganesella hariola carinella* MÖLLENDORFF. Nach RICHARDSON (1985: 428) ist dies jedoch ein Synonym von *capitium*.

Anmerkung 39: Nach RICHARDSON (1985: 216) handelt es sich um die Gattung *Planispira*. Diese hat aber ein Verbreitungsgebiet, das nach ZILCH (1960: 608, 609) von Indonesien über Neuguinea nach Nord-Australien reicht.

Anmerkung 40: In dieser Familie finden sich bei PANHA (1996: 36) *Bradybaena (Acusta) brevispira* MORELET und *Cathaica brevispira* HAINES. YEN (1939: 132) und TREW (1992: 19) nennen *Bradybaena b.* (H. ADAMS 1870) bzw. *Helix (Acusta) b.* H. ADAMS 1870 von China. RICHARDSON (1983: 23) gibt für *Bradybaena b.* ebenfalls H. ADAMS als Verfasser an.

Die Art wurde von China beschrieben und von den oben genannten Autoren nur von dort gemeldet. Wir halten ihr Vorkommen in Thailand für zweifelhaft.

Anmerkung 1: Ausser bei den Prosobranchiern und den Taxa, die nach der Veröffentlichung von PANHA's Liste eingeführt worden sind, haben wir Arten, die in der Auflistung von PANHA (1996) nicht verzeichnet sind, mit einem "*" gekennzeichnet.

Anmerkung 2: In der Beschreibung gibt PANHA (S. 56) an "...sinistral...". Die Abbildung 3 auf der gleichen Seite zeigt aber ein rechtsgewundenes Gehäuse. J. GERBER vom Field Museum of Natural History in Chicago, war so freundlich, nach den in der Originalbeschreibung für dieses Museum angegebenen Paratypen Ausschau zu halten. Dies erwies sich leider als erfolglos. Seine Nachfrage beim Autor erbrachte folgende Antwort: "On my publication, there was a kind of printing error in Malacological Review 1997, actually figure 3 is *Diplommatina naivanetri* and Fig. 4 is *D. hidagai*. The correction will be done in my coming book on Micro snails of Thailand." (GERBER in litt.).

Anmerkung 3: PANHA (S. 133) schreibt "This is the first record of the genus *Opisthostoma* for Thailand." Er übersieht, dass bereits SYKES im Jahre 1903 (S. 198; Taf. 20, Abb. 4, 5) eine Art dieser Gattung von Jalor (S. Thailand) beschrieben hat.

Anmerkung 4: Die Art wurde von STOLICZKA (1873: 32; pl. 2, fig. 3) von Malaysia ("Penang et in Provincia Wellesley dicta...") beschrieben. Auf einer kleinen Kalksteininsel, vorgelagert dem Nopparath Beach bei Krabi, Krabi Provinz, konnten zahlreiche Leergehäuse gesiebt werden, die der Abbildung bei STOLICZKA entsprechen.

Anmerkung 5: *Hypselostoma translucidum* wird von FISCHER & DAUTZENBERG (1904, Vol. 3: 19) für "Ile Samui, Golfe de Siam" angegeben. BENTHEM-JUTTING (1950: 43) bemerkt dazu: "...(nomen nudum, name never published by MÖLLENDORFF)".

Anmerkung 6: Die Gattung *Pupisoma* STOLICZKA, 1873 wird von THIELE (1931: 515) und ZILCH (1959: 173) in die Familie Valloniidae gestellt, während VAUGHT (1989: 80) und MILLARD (1996: 264) sie in Vertiginidae führen.

Anmerkung 7: H. NORDSIECK (in litt.) teilte uns mit, dass ihm aus den Aufsammlungen von THOMPSON und AUFTENBERG aus dem Jahr 1988 mehrere, bisher unbeschriebene, Arten vorliegen. Diese sollen in absehbarer Zeit publiziert werden.

Anmerkung 8: PANHA (1996: 33) bezeichnet diese Art als *Stenogyra erecta*.

Anmerkung 9: Unter dem falschen Artnamen "*pelluceus*" stellt PANHA (1996: 33) sie in die Gattung *Streptaxis*.

Anmerkung 10: PANHA (1996: 33) führt die Art unter der Gattung *Streptaxis* auf.

Anmerkung 11: Bei PANHA (1996: 33) erscheint diese Art unter der Gattung *Micratemon* [sic!]. Nach ZILCH (1960: 561) ist *Micratemon* mit nur einer Art auf den Philippinen vertreten.

Anmerkung 12: PANHA (1986: 33) verwendet den Gattungsnamen *Streptaxis*.

Anmerkung 13: MÖLLENDORFF (1894: 146; 1902: 154) beschrieb drei Unterarten: *depressa*, *expansilabris* und *subglobosus*. PANHA (1996: 33) führt das Taxon *depressa* zweimal auf, als *Streptaxis* und weiter unten - richtig - unter *Perrotetia*.

Anmerkung 14: Die Abgrenzung der Gattungen innerhalb der Überfamilie Helixarionioidea ist in den allermeisten Fällen nur durch anatomische Untersuchungen, von denen es bisher nur ganz wenige gibt, möglich. Daher sind die Zuordnungen zu den Gattungen vorläufig.

Die Problematik zeigt sich in der systematischen Sicht verschiedener Autoren.

THIELE (1931): Stirps Ariophantacea, Familie Ariophantidae mit den Unterfamilien Kalliellinae, Ereptinae, Trochonanininae, Microcystinae, Sesarinae, Trochomorphinae, Macrochlamydiae, Ariophantinae, Staffordinae, Xestinae, Durgellinae, Sophininae, Helicarioninae, Girasiinae, Parmarioninae, Urocyclinae.

ZILCH (1959): Superfamilia Ariophantacea, Familie Trochomorphidae, Familie Euconulidae mit Unterfamilien Euconulinae und Microcystinae, Familie Helicarionidae mit Unterfamilien Sesarinae, Ereptinae und Helicarioninae, Familie Ariophantidae mit Unterfamilien Dyakiinae, Parmarioninae, Ariophantinae, Girasiinae, Macrochlamydiae, Cyclopeltinae, Chroniinae und Durgellinae, Familie Urocyclidae mit Unterfamilien Trochozonitinae und Urocyclinae.

SOLEM (1966): Familie Helicarionidae mit Unterfamilien Euconulinae, Helicarioninae, Ariophantinae und Dyakiinae.

VAUGHT (1989): Überfamilie Helixarionioidea, Familie Euconulidae, Familie Helixarionidae mit Unterfamilien Helixarioninae, Sesarinae, Ereptinae und Microcystinae, Familie Ariophantidae mit Unterfamilien (Ariophantinae offensichtlich vergessen!) Dyakiinae, Chroniinae, Durgellinae, Parmarioninae, Macrochlamydiae und Chroniinae, Familie Trochomorphidae, Familie Urocyclidae mit Unterfamilien Urocyclinae und Trochozonitinae, Familie Cyclopeltidae.

MILLARD (1996) übernimmt das System von VAUGHT weitestgehend (auch er vergisst die Ariophantinae) mit der Ausnahme, dass die Reihenfolge innerhalb der Ariophantidae etwas abgeändert ist.

Anmerkung 41: In dieser Gattung nennt PANHA (1996: 36) u.a. *orthacheilus* HEUDE 1890. Dies ist nach RICHARDSON (1983: 12) ein Synonym von *hupensis* GREGLER 1885. (YEN [1939: 147] und ZILCH [1968: 170] geben die richtige Jahreszahl 1887 an.)

Sowohl *orthacheilus* als auch *hupensis* wurden von China beschrieben und sind sonst auch nur von dort gemeldet. Wir halten daher das Vorkommen dieser Art in Thailand für zweifelhaft.

Anmerkung 42: Die Art wird von PANHA (1996: 36) als *Ganesella diplogramme* [sic!] MÖLLENDORFF in der Familie Camaenidae aufgeführt.

Anmerkung 43: PANHA (1996: 36) verwendet den Autoren-Namen PFEIFFER.

Anmerkung 44: Laut RICHARDSON (1983: 19) soll dies ein Synonym von *visayana* MÖLLENDORFF 1888 sein. Eine Begründung für seine Auffassung liefert er nicht.

Anmerkung 45: PANHA (1996: 32) führt diese Art doppelt auf: als *Buliminus siamensis* REDFIELD in der Familie Buliminidae und als *Cerastua siamensis* (REDFIELD) in der Familie Cerastuidae.

BLANFORD (1903: 275) stellt sie als *Cerastua siamensis* (REDF.) zu "Pupidae (?)".

Anmerkung 46: In "Of Sea and Shore" 23 (4) beschreiben PANHA & PATAMAKANTHIN *Alycaeus somnueki*. In der Einleitung bemerken sie auf S. 189 "Five species of *Alycaeus* were reported previously from Thailand... *A. anapetes* Panha & Burch 1998." Im Literaturverzeichnis erscheint: "PANHA, S. and BURCH, J. B. 1998. A new species of *Alycaeus* from Thailand (Prosobranchia: Cyclophoridae: Cyclophoridae). Malacological Review, 31 (in press)." Weder in der Bibliothek der Sektion Malakozoologie des Forschungs-Instituts Senckenberg, Frankfurt/M. (eigene Recherche), noch in denen des Field-Museums, Chicago, USA (Gerber in litt.) und des Hauses der Natur, Cismar, befindet sich eine Ausgabe der Malacological Review erschienen nach 1997. Sollte es sich bestätigen, dass die letzte Ausgabe Vol. 30 war, so ist das Taxon *anapetes* als nomen nudum anzusehen.

A Bibliography of the Recent Land- and Freshwater Molluscs of Thailand and Myanmar (former Burma).

A detailed bibliography on the non-marine aquatic Mollusca of Thailand and adjacent countries can be found in BRANDT [1974], Archiv für Molluskenkunde, 105.

- BENSON, W. H. (1853): Additional character of the shell of the cyclostomatous genus *Alycaeus* of GRAY, with descriptions of its animal inhabitant, of a fourth species, and of other new Indian Cyclostomata; also, remarks on an unrecorded character in *Diplommatina*. – The Annals and Magazine of Natural History, (2) 11: 283-287; London. [*A. urnula*]
- BENSON, W. H. (1856a): Amended description of the genus *Scraphula*. BENSON, a freshwater form of the Arcacea; with characters of a new species from Tenasserim. – The Annals and Magazine of Natural History, (2) 17: 127-129; London. [*S. pinna*]
- BENSON, W. H. (1856b): Description of *Tanyostoma tubiferum*, a Burmese form related to the genus *Anastoma* of LAMARCK. – The Annals and Magazine of Natural History, (2) 17: 129-131; London.
- BENSON, W. H. (1856c): Characters of seventeen new forms of the Cyclostomacea from the British provinces of Burmah, collected by W. THEOBALD, jun., Esq. – The Annals and Magazine of Natural History, (2) 17: 225-233; London. [*Alycaeus pyramidalis*, *A. umbonalis*, *A. amphora*, *A. sculptilis*, *A. armillatus*, *Pterocyclos pullatus*, *P. cetra*, *Cyclophorus? scissimargo*, *C. calyx*, *Leptopoma aspirans*, *Megalomastoma gravidum*, *Pupina arula*, *P. artata*, *P. imbricifera*, *Otopoma blennus*, *Hydrocena illex*, *H. pyxis*]
- BENSON, W. H. (1856d): Remarks on the genera *Tanyostoma*, *Nematura*, and *Anailus*. – The Annals and Magazine of Natural History, (2) 17: 342-343; London.
- BENSON, W. H. (1856e): Descriptions of three new species of *Paludomus* from Burmah, and of some forms of *Stenothyra (Nematura)* from Penang, Mergui, &c. – The Annals and Magazine of Natural History, (2) 17: 494-501; London. [*P. labiosa*, *P. ornata*, *P. regulata*]
- BENSON, W. H. (1856f): Descriptions of one Indian and nine new Burmese Helices; and notes on two Burmese Cyclostomacea. – The Annals and Magazine of Natural History, (2) 18: 249-254; London. [*Helix pylaica*, *H. artificiosa*, *H. capessens*, *H. convallata*, *H. hariola*, *H. bifoveata*, *H. pansa*, *H. bolus*, *H. textrina*]
- BENSON, W. H. (1857a): Characters of *Streptauleus*, a new genus, and of several species of the Cyclostomacea from Sikkim, the Khasia Hills, Ava, and Pegu. – The Annals and Magazine of Natural History, (2) 19: 201-211; London. [*Cyclophorus cryptomphalus*, *C. scurra*, *C. theobaldianus*, *C. balteatus*]
- BENSON, W. H. (1857b): New species of *Bulimus* from India, Burma, and the Mauritius. – The Annals and Magazine of Natural History, (2) 19: 327-330; London. [*B. theobaldianus*, *B. putus*]
- BENSON, W. H. (1859a): A sectional distribution of the genus *Alycaeus*, GRAY, with characters of six new species and of other Cyclostomidae collected at Darjiling by W. T. BLANFORD, Esq., Geol. Survey. – The Annals and Magazine of Natural History, (3) 3: 176-184; London.
- BENSON, W. H. (1859b): Descriptions of new species of *Helix*, *Streptaxis*, and *Vitrina*, collected by Mr. W. THEOBALD, jun., in Burmah, the Khasia Hills, and Hindustan. – The Annals and Magazine of Natural History, (3) 3: 184-189; London. [*H. ceryx*, *H. ategia*, *H. arx*, *H. catinus*, *H. oldhami*, *H. cassidula*, *H. bombax*]
- BENSON, W. H. (1859c): New Helicidae collected by W. THEOBALD, Esq., jun., in Burmah and the Khasia Hills, and described by W. H. BENSON. – The Annals and Magazine of Natural History, (3) 3: 387-393; London. [*Helix petasus*, *H. cauisa*, *H. molecula*, *H. acerra*, *H. pauxillula*]
- BENSON, W. H. (1859d): Characters of a new Burmese *Streptaxis* and of two forms belonging to a peculiar section of *Helix* collected by Captain RICHARD H. SANKEY, Madras Engineers. – The Annals and Magazine of Natural History, (3) 3: 471-474; London. [*S. sankei*, *Helix forabilis*, *H. calias*, *H. schistostelalis*]
- BENSON, W. H. (1859e): Observations on the shell and animal of *Hybocystis*, a new genus of Cyclostomidae, based on *Megalomastoma gravidum* and *Otopoma blennus*, B.; with notes on other living shells from India and Burmah. – The Annals and Magazine of Natural History, (3) 4: 90-93; London.
- BENSON, W. H. (1859f): Notes on the animals of *Rhaphauleus chrysalis*, *Pupina artata*, *Otopoma clausum*, *Helix achatina*, and *H. pylaica*. – The Annals and Magazine of Natural History, (3) 4: 93-96; London.
- BENSON, W. H. (1860a): On the Burmese genus *Sophina*. – The Annals and Magazine of Natural History, (3) 5: 26-27; London.

- BENSON, W. H. (1860b): On *Clostophis* and *Rhiostoma*, new Burmese genera of land-shells. – The Annals and Magazine of Natural History, (3) 5: 95-97; London. [*Clostophis sankeyi*, *Rhiostoma haughtoni*]
- BENSON, W. H. (1860c): Notes on *Plectopylis*, a group of Helicidae distinguished by several internal plicate epiphragms; with the character of a new species. – The Annals and Magazine of Natural History, (3) 5: 243-247; London. [*Helix (Plectopylis) leiophis*]
- BENSON, W. H. (1860d): Notes on the subgenus *Corilla*, H. & A. ADAMS; and on the group *Plectopylis*. BENSON; also on *Pollicaria*, GOULD, and *Hybocystis*, BENSON. – The Annals and Magazine of Natural History, (3) 6: 98-100; London.
- BENSON, W. H. (1860e): Characters of new land-shells from Burmah and the Andamans. – The Annals and Magazine of Natural History, (3) 6: 190-195; London. [*Helix ochthoplax*, *H. conseptia*, *H. pilidion*, *H. peguensis*, *Pupina peguensis*, *Cyclophorus flavilabris*, *Hydrocena frustrillum*, *H. rawesiana*]
- BENSON, W. H. (1861): Description of a new *Alycaeus* from the Andaman Islands; with notes on other Cyclostomacea. – The Annals and Magazine of Natural History, (3) 7 (37): 28-29; London.
- BENSON, W. H. (1862): Descriptions of Indian and Burmese species of the genus *Unio*. – The Annals and Magazine of Natural History, (3) 10: 184-195; London. [*U. pugio*]
- BENSON, W. H. (1863a): Characters of new land-shells of the genera *Helix*, *Clausilia*, and *Spiraxis*, from the Andamans, Moulmein, Northern India and Ceylon. – The Annals and Magazine of Natural History, (3) 11: 87-91; London. [*H. gordoniae*]
- BENSON, W. H. (1863b): Characters of new land-shells from the Andaman Islands, Burmah, and Ceylon, and of the animal of *Sophina*. – The Annals and Magazine of Natural History, (3) 11: 318-323; London. [*Helix scenoma*, *H. brachyplecta*, *H. fritillata*, *Clausilia bulbosus*, *Opisthophorus gordonii*]
- BENSON, W. H. (1863c): Characters of new operculate land-shells from the Andamans, and of India and Burmese species of *Pupa*. – The Annals and Magazine of Natural History, (3) 12: 425-429; London. [*P.avanica*]
- BENSON, W. H. (1864): On the classification of the Cyclostomacea of Eastern Asia. – The Annals and Magazine of Natural History, (3) 13: 441-465; London.
