Ministry of Agriculture and Fisheries,
Fisheries Department,
43, Parliament Street,
London, S.W.1.

March, 1938.

To the Minister of Agriculture and Fisheries.

Sir,

I have the honour to submit herewith the statistical tables relating to Sea Fisheries for the year 1937. Two new tables are included—No. 18 giving the quantity of herrings cured in pickle at each station for export and No. 19 dealing with imports under the Sea Fishing Industry (Regulation of Landing) Orders from the principal countries concerned.

The total quantity of wet fish of British taking landed in England and Wales during the year was 17,035,000 cwts., valued at £11,933,000, as compared with 15,813,000 cwts., valued at £11,931,000 in 1936—an increase of 8 per cent. in quantity, but practically no increase in value.

The demersal group increased by 6 per cent. to 13,333,000 cwts. Of the four chief kinds, cod (6,949,000 cwts.), haddock (1,898,000 cwts.), and hake (567,000 cwts.) increased by 7 per cent., 19 per cent. and 22 per cent. respectively, while plaice (519,000 cwts.) decreased by 6 per cent. Halibut (90,000 cwts.) also decreased by 6 per cent. The pelagic group increased by 17 per cent. to 3,695,000 cwts., herrings (3,376,000 cwts.) being 18 per cent. higher.

The average value per cwt. (on landing) of wet fish as a whole was 14s. 0d. (1.5d. per lb.). This was 1s. 1d. below the average for 1936 and 2s. 8d. below the average for 1935. The average for the demersal group was 15s. 11d. (1.71d. per lb.)—10d. lower than in 1936 and 3s. 4d. lower than in 1935. Taking the principal kinds, the averages for cod (10s. 7d.), haddock (15s. 10d.), hake (37s. 1d.), skates and rays (24s. 6d.), turbot (67s. 6d.) and whiting (13s. 2d.) were lower by 4d., 3s. 4d., 5s. 0d., 1s. 9d., 5s. 5d., and 2s. 11d. respectively while plaice (50s. 0d.) and soles (123s. 4d.) were higher by 2s. 8d. and 3s. 4d. respectively. Herrings (7s. 3d.) were 1s. 3d. cheaper and mackerel (13s. 8d.) were 3s. 9d. dearer.

The value of shellfish landed was £442,000 as against £444,000 in 1936.

The proportion of "bottom fish" (i.e. demersal fish and pelagic fish secured by demersal catching methods) landed by steam trawlers was 97 per cent., the same as in 1936, the actual quantity, 13,203,000 cwts., being 5 per cent. greater. The quantities landed by sailing trawlers, steam and motor liners, and steam Danish seiners were less than in the previous year, but the landings by motor trawlers and motor Danish seiners were greater. The average quantity

landed per unit of time was greater than in 1936 for all the principal types except sailing trawlers and motor liners. In the case of steam trawlers, with an average landing per 100 hours fishing of 392 cwts., the increase was 8 per cent.

The total quantity of bottom fish landed from the North Sea (1,790,000 cwts.) showed an increase of 2 per cent., and the quantity from Iceland (3,528,000 cwts.) an increase of 3 per cent. The quantity from the Barents Sea (2,032,000 cwts.) increased by 35 per cent., from the Norwegian Coast (664,000 cwts.) by 58 per cent., and from Bear Island (2,156,000 cwts.) by 2 per cent. Landings from Faroe (640,000 cwts.) decreased by 28 per cent. and from Rockall (113,000 cwts.) by 43 per cent. South Ireland yielded 14 per cent. more while West Scotland, West Ireland and the Bristol Channel also gave increased catches.

The number of first-class fishing vessels on the Register of England and Wales on 31st December last (1,966) was 144 less than on the 31st December, 1936. Steamers (1,520) numbered 94 less, motor boats (367) 14 less and sailing boats (79) 36 less.

The quantity of fish of all kinds (fresh and preserved) imported into the United Kingdom totalled 3,693,000 cwts., valued at £10,378,000—an increase of 2 per cent. in quantity and of 10 per cent. in value as compared with the previous year. Deducting the quantity re-exported there remained for consumption in the United Kingdom 3,491,000 cwts., valued at £9,794,000, an increase of 1 per cent. in quantity and of 10 per cent. in value. The cured and canned imports increased, but the fresh imports decreased. The quantity received direct from the fishing grounds (407,000 cwts.) was 14 per cent. less. Of the imports retained, fresh or frozen fish (1,852,000 cwts.) decreased by 5 per cent., and uncanned cured fish (78,000 cwts.) by 7 per cent., while canned fish (1,561,000 cwts.) increased by 9 per cent.

Exports of British fish (4,024,000 cwts., valued at £3,750,000) showed a decrease of 11 per cent. in quantity and of 5 per cent. in value. Fresh fish (1,139,000 cwts.), which consisted mainly of herrings, decreased by 15 per cent., cured herrings (2,378,000 cwts.) decreased by 14 per cent., while canned fish (98,000 cwts.) increased by 26 per cent.

I am, Sir,

Your obedient Servant,

HENRY G. MAURICE,

Fisheries Secretary.

SEA FISHERIES.—STATISTICAL TABLES, 1937.

CONTENTS

NOTE.—Unless otherwise stated all the tables relate to England and Wales (including the Isle of Man) and to fish of British taking.

	Fish Landed—Year 1937 only.	PAGE

Net Tonnage	..	..	..	54,445	24,907	3,873	83,225

Of the steamers, 383 (net tonnage 32,873) were trawlers, 560 (net tonnage 21,565) were engaged in drifting and lining and 2 (net tonnage 7) in mussel dredging. Of the motor boats, 660 (13,721 tons) were engaged mainly in the herring fishery and 1,785 (11,184 tons) of which 22(102 tons) were trawlers, mainly in demersal fishing. Of the sailing vessels, 14 (40 tons) were trawlers.

* Fishing boats are divided into the following classes:—

The *First Class* includes all steam and motor boats of 15 tons gross tonnage and upwards and all sailing boats of 15 tons net tonnage and upwards.

The *Second Class* includes all steam and motor boats of less than 15 tons gross tonnage and other vessels of less than 15 tons net tonnage but of 18 feet keel and upwards.

The *Third Class* includes all boats (other than steam or motor) under 18 feet keel, except those navigated by oars only and marked with the owner's name and the port or place to which they belong.
