STATISTIQUE
DES
PÊCHES MARITIMES.

ANNÉE 1922.

I
RENSEIGNEMENTS GÉNÉRAUX.

RAPPORT
AU SOUS-SECRÉTAIRE D'ÉTAT
CHARGÉ DES PORTS, DE LA MARINE MARCHANDE
ET DES PÊCHES.

J'ai l'honneur de remettre au Sous-Secrétaire d'État les statistiques des pêches maritimes, de la mytiliculture et de l'ostréiculture pour l'année 1922.

Les remarques que comportent ces statistiques sont les suivantes :

1° *Matériel.*

Le nombre des navires de pêche, qui était de 21,440 en 1921, atteint 22,149 en 1922.

L'augmentation porte principalement sur les bateaux à propulsion mécanique, dont le nombre passe de 819 à 968, soit un accroissement

de 18.19 p. 100 et le tonnage de 4,589 à 4,925, correspondant à un accroissement de 7.32 p. 100.

La flotte des bateaux à vapeur, qui comprenait, en 1921, 436 navires d'un tonnage global de 75,183 tonneaux, est constitué, en 1922, par 476 navires correspondant à un tonnage de 84,772 tonneaux. Ces chiffres révèlent un accroissement de 9.17 p. 100 quant au nombre et de 12.7 p. 100 quant au tonnage.

Le tableau ci-dessous fait connaître les variations d'importance du matériel navire de 1914 à 1922 :

ANNÉES.	NOMBRE DES BATEAUX.			TONNAGE DES BATEAUX.			VALEUR DES BATEAUX.

Il convient de signaler la mise en pratique, au cours de l'année 1922, d'un engin de pêche nouveau : le chalut *Vigneron Dahl*, dont la puissance de capture paraît devoir augmenter dans de très fortes proportions la quantité de poisson mise à terre par les bateaux qui l'ont adopté.

2° Personnel.

Le nombre total des personnes employées à la pêche s'est élevé à 116,684. 83,414 se sont livrées à la pêche en bateau et 33,270, dont 12,921 femmes et 5,172 enfants ont pratiqué la pêche à pied.

En 1921, le nombre total des pêcheurs était de 112,470. 82,100 étaient employés à la pêche en bateau et 30,370, dont 12,119 femmes et 5,054 enfants à la pêche à pied.

Le personnel est donc en augmentation de 4,214 unités (1,314 pour la pêche en bateau ; 2,900 pour la pêche à pied).

3° Production.

La valeur globale des produits de pêche en 1922 est de 565,741,064 fr., tandis qu'elle était de 533,387,200 francs en 1921. Elle est donc en 1922 en progression sur l'année précédente.

La production exprimée en kilogrammes a, au contraire, diminué ; elle est en 1922 de 223,058,398 kilogrammes alors qu'elle était, en 1921, de 230,587,267 kilogrammes.

Cette diminution porte sur les produits de la pêche côtière dont le rendement est très nettement inférieur. Au contraire, le rendement des grandes pêches accuse une augmentation importante. La quantité de morues pêchées s'élève à 43,679,666 kilogrammes, alors qu'elle était seulement de 35,671,407 kilogrammes en 1921. Ce rendement est cependant encore inférieur de près de 4 millions de kilogrammes à ce qu'il était en 1913.

L'augmentation en valeur, malgré la diminution en quantité, s'explique par l'élévation des cours du poisson. En effet, tandis qu'aux Halles centrales de Paris le prix de gros du poisson était, en 1921, voisin de 2 fr. 50, il atteint, en 1922, une valeur moyenne de 2 fr. 72.

Dans les régions de la Manche et de l'Océan, le rendement économique (valeur des produits pêchés par les bateaux armés dans le syndicat) et le rendement commercial (valeur des produits débarqués dans le syn-

dicat) ont progressé parallèlement. Ils ont au contraire diminué en Méditerranée.

Le rendement économique est, dans la région de la Manche, supérieur au rendement commercial. La situation est inverse dans la région de l'Océan. En Méditerranée, les valeurs s'équilibrent sensiblement.

Les chiffres traduisant le rendement économique et le rendement commercial pour chaque port sont, comme les années précédentes, indiqués au premier tableau d'ensemble de la section IV.

Ostréiculture et Mytiliculture.

Pour la saison 1921-1922, l'ostréiculture a produit, comme pour la saison 1920-21, un total de près de 648 millions d'huîtres. L'ensemble de la production n'a donc pas varié. Par contre, la valeur des produits a beaucoup augmenté; elle est, en effet, de plus de 42 millions de francs pour 1921-1922, alors qu'elle était seulement de 35 millions pour la saison précédente. Cette augmentation en valeur est due à l'élévation du prix de l'huître plate, dont la production continue de diminuer; elle passe, en effet, de près de 247 millions d'unités en 1920-1921 à 208 millions. La maladie signalée dans le précédent rapport a persisté pendant la saison 1921-1922.

La mytiliculture a produit 221,627 hectolitres de moules pour une valeur de 6,692,381 francs; la saison précédente avait produit 107,325 hectolitres pour une valeur de 3,958,183 francs.

J'ai l'honneur de proposer au Sous-Secrétaire d'État de faire tirer à 350 exemplaires la présente statistique qui sera répartie entre les Administrateurs de l'Inscription maritime et les personnalités et groupements qu'elle est susceptible d'intéresser.

*Le Directeur du Service des Pêches maritimes
et du Personnel central,*

Signé : LECOURBE.

APPROUVÉ :

Paris, le 21 juin 1924.

Le Sous-Secrétaire d'État,

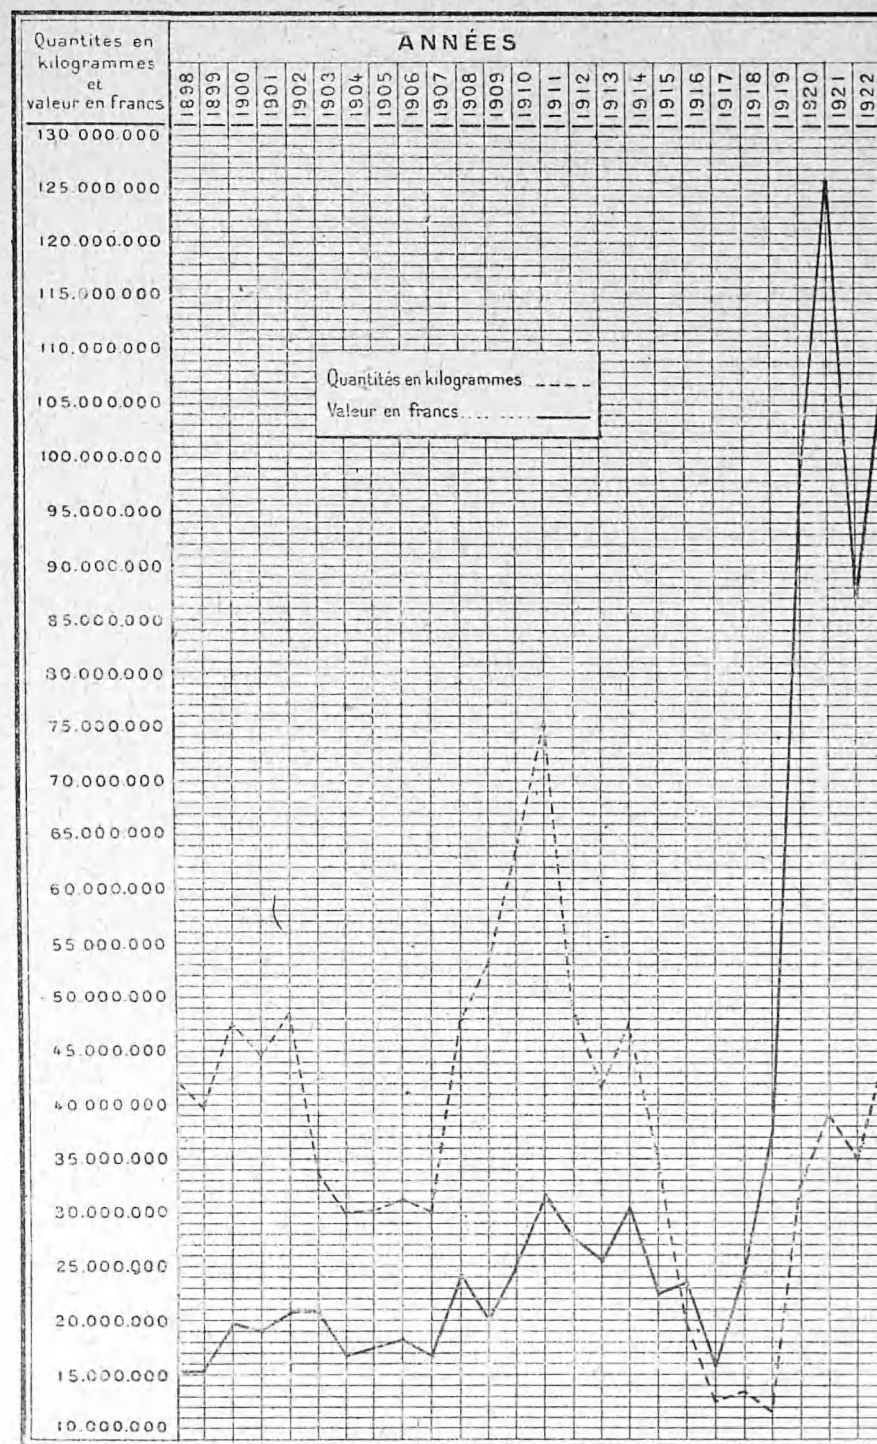

*chargé des ports, de la Marine marchande
et des pêches,*

Signé : LÉON MEYER.

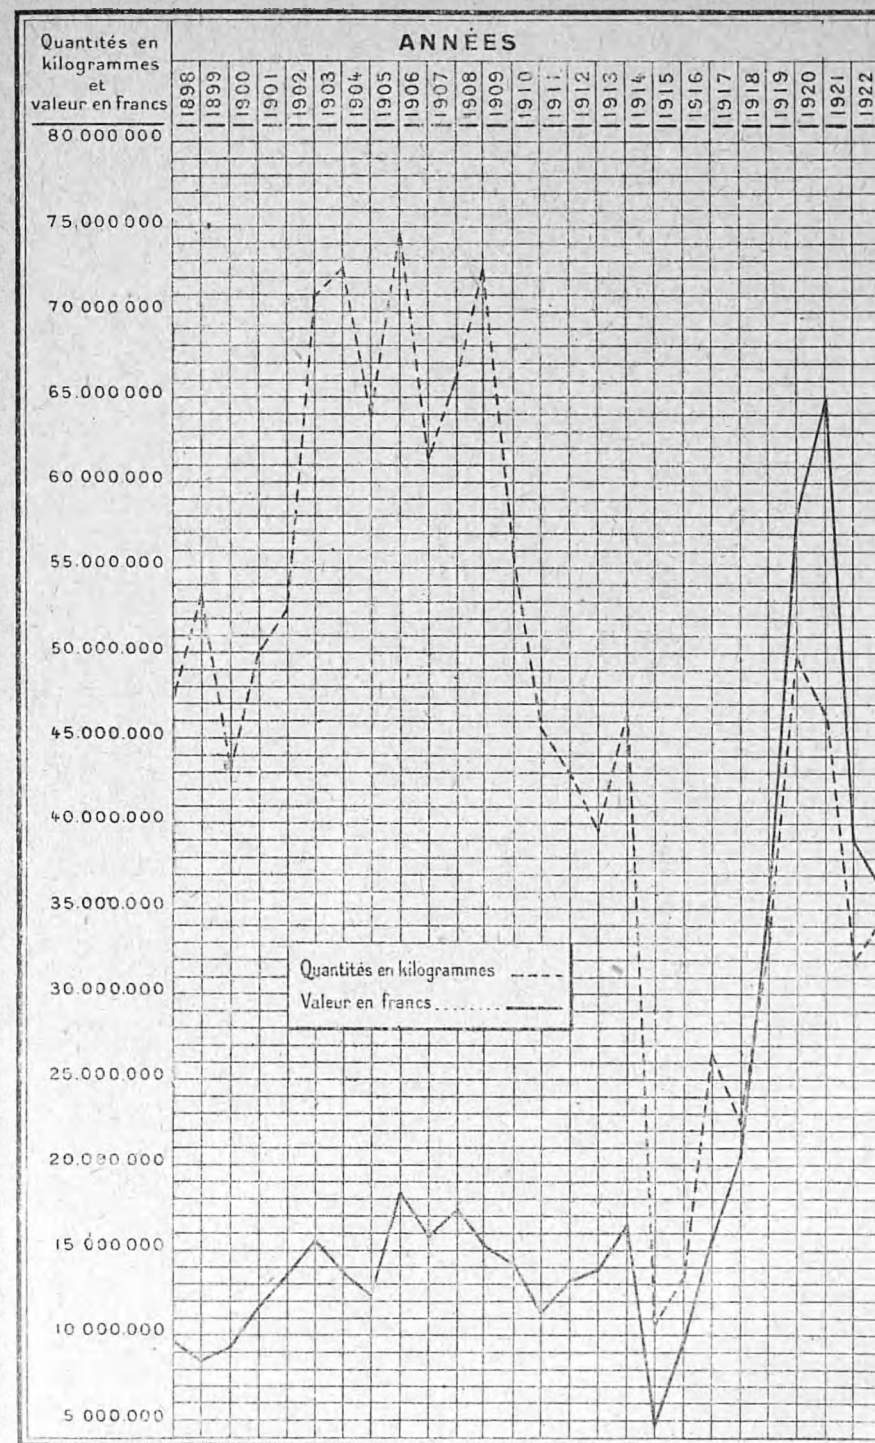

TABLEAUX ANNEXES.

-
- 1° — Graphique de la pêche de la *morue* de 1898 à 1922;
 - 2° — Graphique de la pêche du *hareng* de 1898 à 1922;
 - 3° — Graphique de la pêche de la *sardine* de 1898 à 1922;
 - 4° — Graphique pour l'*Ostréiculture*. — Rendement en nombre et en valeur de 1898 à 1922.

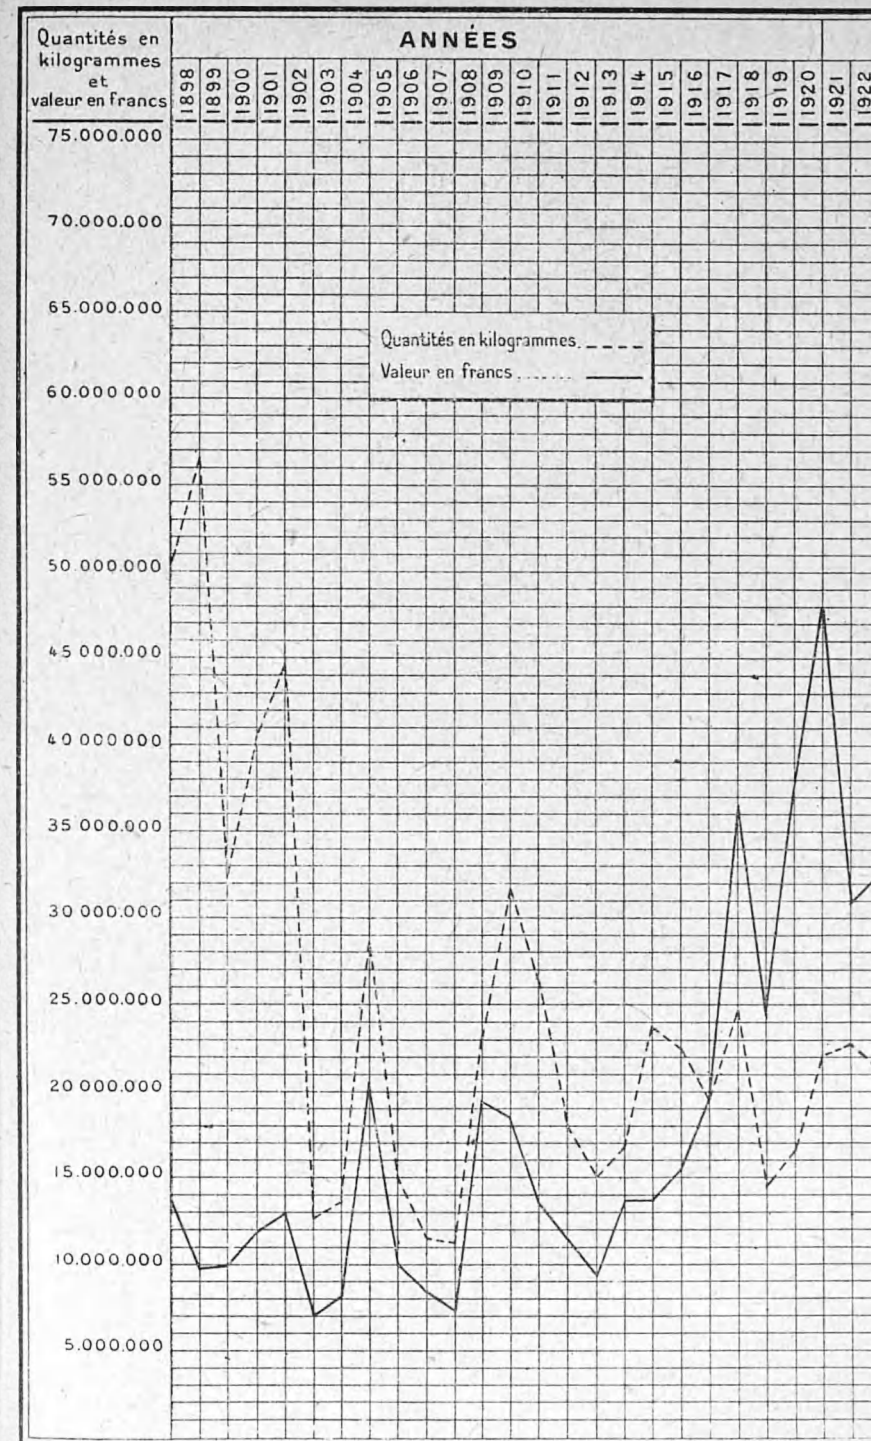

Pêche de la MORUE de 1898 à 1922

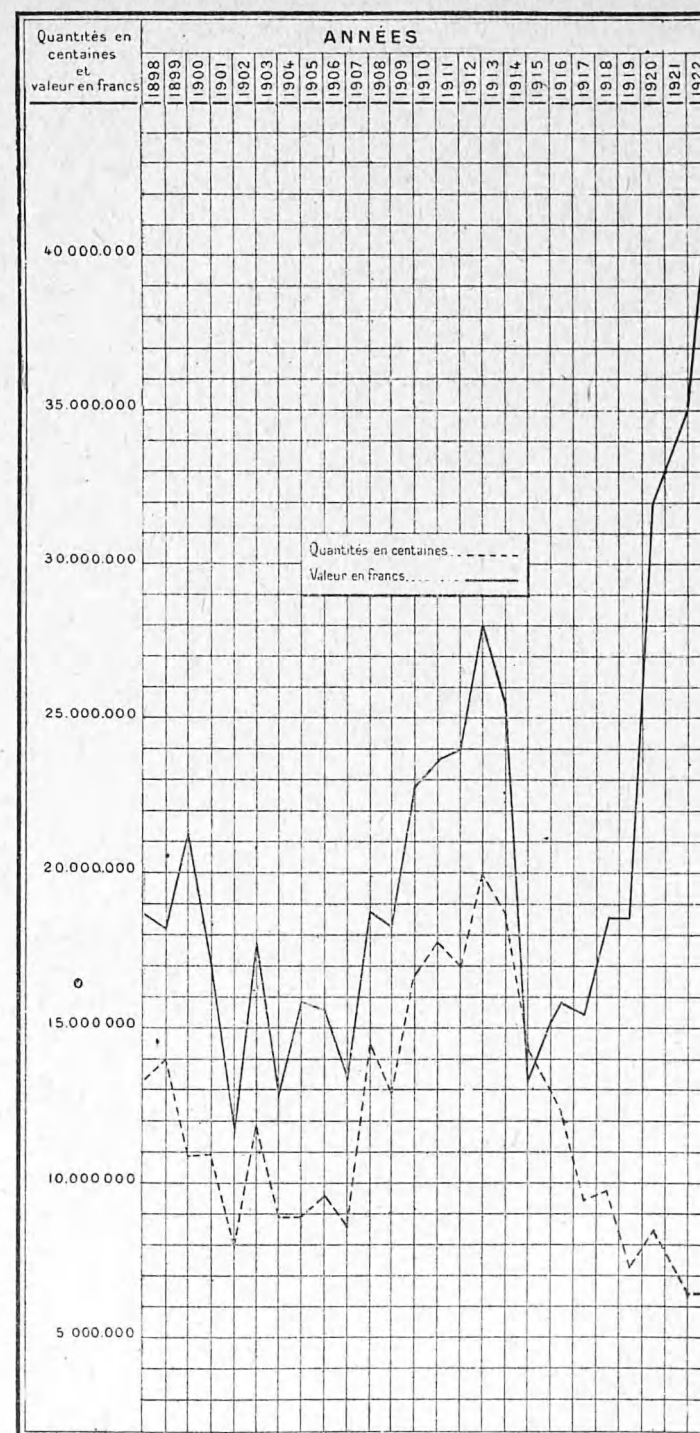

Pêche du HARENG de 1898 à 1922

Pêche de la SARDINE de 1898 à 1922

OSTRÉICULTURE — Rendement en nombre et en valeur de 1898 à 1922

II ET III

TABLEAUX COMPARATIFS

des résultats de la pêche (pêche en bateau et pêche à pied) et de l'ostréiculture (huîtres indigènes et huîtres portugaises) pour les années 1913 à 1922 et Rendement des différentes pêches en 1922.

II. — TABLEAU comparatif des résultats de la pêche (pêche en bateau et pêche à pied) pour les années 1913 à 1922.

(1) Il est alloué une prime de 40 fr. 50 par homme effectivement employé à la sécherie, à raison d'un homme au plus par trois hommes employés à la pêche.

(2) Les petits pêcheurs de Saint-Pierre et Miquelon ne se sont pas livrés à l'industrie de la sécherie en 1922.

Les sommes de 70,470 francs (3), 12,239 fr. 10 (4) et 53,986 fr. 50 (5), ne représentent pas le décompte exact des primes par rapport au nombre de marins figurant à la statistique. Les différences proviennent : 1° de ce que la prime n'a pas été allouée à 2 navires, armés sans sécherie, n'ayant pas rempli les conditions de leur armement ; 2° de ce que d'une part, la prime n'a pas été allouée à 3 navires, armés avec sécherie, n'ayant pas rempli les conditions de leur armement ; que, d'autre part, deux hommes ont manqué le départ, et qu'enfin la prime de sécherie n'a pas été allouée à 2 navires n'ayant effectué aucune opération de sécherie et à un troisième n'ayant pu produire le certificat de sécherie ; 3° de ce que 4 hommes (gravières), compris dans la déclaration d'armement d'un navire n'ont pas pris part à la première campagne de pêche que ce navire a effectuée en Islande au début de la saison. Dans ces différents cas, les sommes perçues à titre d'acompte de prime ont été retenues sur le solde.

III. Tableau comparatif des primes allouées pour encouragements aux pêches maritimes, de 1856 à 1922.

ANNÉES.	PRIMES	PRIMES	PRIMES	PRIMES	PRIMES	PRIMES	TOTAUX.
	D'ARMEMENT.	D'IMPORTATION de rogues par les navires pêcheurs.	D'ACHAT de rogues.	POUR LES POISSONS de la Côte occidentale d'Afrique expédiés directement des lieux de pêche ou exportés de France à destination des pays étrangers ou des colonies françaises autres que l'Algérie, le Sénégal et la Mauritanie.
