INTRODUCTION

At the third meeting of the ICES Working Group on Effects on Fisheries of Marine Sand and Gravel Extraction - Rijswijk (Z.H.), The Netherlands, 21-23 March 1979, it was recommended: (4) that a summarizing bibliography should be prepared by members on all relevant topics related to dredging (including documents by the Working Group) and be sent to the Working Group Chairman for submission as a draft to the MEQ Committee at the 68th Statutory Meeting and that additional information should be submitted annually to the MEQ Committee under a separate heading.

A preliminary bibliography, ICES C.M. 1980/E: 13 was presented by the present author at the MEQ Committee at the 68th Statutory Meeting.

This bibliography is now updated with 81 references including those of 1980, on request of the MEQ Committee. From now onwards the administrative report of the MEQ Committee will include a section of relevant literature dealing with the effects of marine sand and gravel extraction.

Data for this bibliography were derived from the previous Working Group reports, as well as supplied by members from France, Ireland, The Netherlands and U.S.A. and the authors reference system. In total 488 references are given.
