Preface

In 1969, the DEUTSCHES HYDROGRAPHISCHES INSTITUT was entrusted with the compilation of an Index for Volumes I-VIII of the Collected Reprints of the IIOE, published by Unesco. The Index has been prepared under the direction of F. Model, former head of the library.

The geophysical papers have been classified by the "HYDROGRAPHISCHE DOKUMENTATION" of the DHI according to the "Universal Decimal Classification (UDC)", and particularly in conformity with the "Bibliographical Classification" issued by the International Association for the Physical Sciences of the Ocean (IAPSO)*. As a UDC has not yet been compiled for Marine Biology, the inclusion of the subjects of these contributions has been carried out with the assistance of the INSTITUT FÜR HYDROBIOLOGIE UND FISCHEREIWISSENSCHAFT DER UNIVERSITÄT HAMBURG. From the title of each publication characteristic terms were selected as descriptors.

The details of this Index have been processed by the computer of the DHI which grouped them and typed them out accordingly, by UDC, descriptors and authors. The Index has been printed thereafter by H. Heenemann KG, Berlin. This work was supported through the financial assistance of Unesco.
