The correct caption of Fig. 3 should read:

Figure 3. The growth of unnamed sequences. (a) Growth in the numbers of new species-level taxa added to GenBank each year. Taxa are partitioned into those with scientific names ('named'; white shading) and those that have informal names ('unnamed'; gray shading). (b) Percentage of

taxa in the named and unnamed categories. Even if these taxa represent known groups but have yet to be fully documented, the rise of such sequences is remarkable and the rate of deposition is only likely to increase.
