

## COASTAL & MARINE SPATIAL PLANNING

### Conference on EUROPEAN ACTION PLANS THEME 3 SESSION RESULTS

Paris, December 2007

## COASTAL & MARINE SPATIAL PLANNING

### CRITERIA FOR RANKING THE TOPICS

- Reference specifically to spatial planning
- Help to spatial planners
- Interdisciplinarity
- Achievability
- Contribution to crossboundary cooperation
- Benefits for policy
- Benefits for stakeholders
- Introducing spatial dimension into research and policy
- Recognition of spatial differentiations across various levels
- Urgency
- Help to promote spatial planning
- Contribution to internal approach/vision

## COASTAL & MARINE SPATIAL PLANNING

### CRITERIA FOR RANKING THE TOPICS

- Reference specifically to spatial planning
- Help to spatial planners
- Interdisciplinarity
- **Achievability**
- Contribution to crossboundary cooperation
- Benefits for policy
- **Benefits for stakeholders**
- Introducing spatial dimension into research and policy
- Recognition of spatial differentiations across various levels
- Urgency
- Help to promote spatial planning
- **Contribution to internal approach/vision**

### RESULTS OF PRE – DISCUSSIONS

#### **Integrate spatial analysis approaches into coastal and marine planning**

- Explore spatial considerations in policy analysis and planning, and elaborate ideas for structuring planning frameworks to serve marine and coastal planning
- Introducing external drivers in Spatial (Coastal and Marine) Planning
- Promote Transnational Collaboration in Marine Spatial Planning
- European coastal zone stakeholders coordination: understanding and strengthening it

### RESULTS OF PRE – DISCUSSIONS

#### **Bridge science and policy making in respect to coastal and marine spatial planning**

- Systems towards monitoring and evaluating conflict areas and problems
- Seeking platforms of further strengthening ICZM policies across spatial levels (national, EU, Regional, global) in relation to Sustainable Development
- Spatial Planning in Coastal Zones and Marine Areas in view of Natura 2000

## COASTAL & MARINE SPATIAL PLANNING

### RESULTS OF PRE – DISCUSSIONS

#### **Promote innovative tools and methodologies for a multispatial and intersectoral coastal and marine spatial planning**

- Linking scientific knowledge to policy and planning process
- Improve spatial planning implementation through legislation
- Tools for Coastal and Marine Spatial Planning
- Elaboration on Tool Comprehensive Estimate of Coastal Planning Process
- Quality Data for a Common Certified Coastal Spatial Planning
- Participation as a Tool for Coastal and Marine Spatial Planning

## COASTAL & MARINE SPATIAL PLANNING

### CLUSTERING THE TOPICS

- **INTEGRATED COASTAL AND MARINE SPATIAL PLANNING**
- **COLLABORATION ACROSS VARIOUS LEVELS**
- **HARMONIZATION OF MONITORING, ASSESSMENT AND INFORMATION**
- **IMPLEMENTATION AND TOOLS**

## COASTAL & MARINE SPATIAL PLANNING

### 1<sup>st</sup> TOPIC

<b>TITLE</b>	<b><i>INTEGRATED COASTAL AND MARINE SPATIAL PLANNING</i></b>
<b>WHY</b>	The <b>integration</b> between all planning systems (including river basin district plans) is vital for coastal areas. The linkages between <b>MSP and ICZM, MSP and terrestrial planning</b> need to be addressed. Within this context issues related to spatial and temporal time <b>scales</b> need to be addressed. It needs new and innovative governance mechanisms, participation approaches and mechanisms
<b>WHAT</b>	Planning frameworks to serve Marine Spatial Planning
<b>HOW</b>	Identification of spatial considerations in policy analysis European coastal zone stakeholders coordination Introduction of external drivers in spatial (coastal and marine) planning, uncertainties, risks, etc

**COASTAL & MARINE  
SPATIAL PLANNING****2<sup>nd</sup> TOPIC**

<b>TITLE</b>	<b><i>HARMONIZATION OF MONITORING, ASSESSMENT AND INFORMATION</i></b>
<b>WHY</b>	Lack of data, fragmentation, quality issues, lack of spatial information, etc
<b>WHAT</b>	Maps, indicators reflecting spatial particularities of European policies and impacts
<b>HOW</b>	Introducing spatial dimension in monitoring and assessment (develop specific indicators) establishing collaboration
