

CALL FOR PROPOSALS

BRILLIANT MARINE RESEARCH IDEA GRANTS 2021 NORTH SOUTH COOPERATION

OFFERED BY VLIZ PHILANTHROPY

SPONSORED BY DEME AND ANTEA GROUP

Call open to PhD students working in the South
strongly linked with a Flemish Marine Research Group
or a Flemish university or university college

The VLIZ philanthropy is a program set up by the Flanders Marine Institute vzw (VLIZ) in order to raise additional funds to support scientists, engineers and students to come up with creative solutions for current problems, to develop innovative techniques and to support sustainable use of our seas and ocean. Any form of support means a step forward for our scientific knowledge.

*With this grant for a ‘Brilliant Marine Research Idea’ for **predocs in the South**, we hope to inspire and enable PhD students working in the South and with a strong demonstrable link with a Flemish Marine Research Group, Flemish university or a Flemish university college to explore and pan out a brilliant idea, an out of the box idea, an on the top research topic, but always framed within their ongoing marine research.*

For more information regarding VLIZ philanthropy, check vliz.be/your-contribution and vliz.be/brilliant-marine-research-idea-grant.

Summary

Budget 2020	5.000 EUR funded by VLIZ philanthropy with the financial support of the sponsors DEME and Antea Group. Maximum fund per grant: 5.000 EUR
Implementation period	The proposed idea has to be executed within one year after the grant is awarded. Start date: 1 March 2021. End date: 28 February 2022.
Eligibility	PhD students working in the South* and with a strong connection with a Flemish Marine Research Group or a Flemish university university college with, at the time of application, less than 6 years of research experience at predoc level (i.e. since starting PhD research). Applicants can only benefit from this grant once during their PhD. <i>* see list of countries at the end of this document</i>
Launch of the call	18 November 2020
Submission deadline	29 January 2021
Selection	The selection will be made before 15 February 2021, by the VLIZ Scientific Committee and representatives of the sponsors DEME and Antea Group.
Topics	Marine research ideas contributing to solving a research question linked to (amongst others) the themes identified in the philanthropy research agenda: marine pollution, oceans and human health, marine biodiversity, climate change, ocean related disasters and marine exploration. Topics supported by the sponsors: - DEME sponsors research situated in engineering & technology, fisheries & aquaculture sciences, economics or biological sciences. - Antea Group sponsors research related to coastal engineering and hydrodynamics, as well as microplastics research. More specifics on pages 6-7.
Required documents	<ul style="list-style-type: none"> - application form (available on this link) - cv of the PhD student - letter of consent of the supervisor affiliated to the student's university or university college (free format) - recommendation letter of the scientist with whom the student is strongly connected at a Flemish Marine Research Group, a Flemish university or a Flemish university college (free format)

What is a grant for ‘Brilliant Marine Research Idea’?

Over the last 20 years, the **Flanders Marine Institute (VLIZ)** has become a knowledge institution indispensable to the marine research landscape. What started as an institute focusing on science support, has evolved into a national and international point of contact for marine research. VLIZ initiates and carries out multidisciplinary research and supports marine experts by providing research infrastructure, data, information and knowledge. VLIZ supports the blue economy and reaches out to a broad public. VLIZ further broadens its marine horizons and aims at becoming a world player in the field of marine and coastal research.

In 2013, VLIZ was recognized as a charitable organization and therefore developed a philanthropy program. Through this program, VLIZ is able to raise additional funds through membership fees, donations, sponsorships, etc. to provide financial support to promote marine research worldwide. The Brilliant Marine Research Idea grants are offered by **VLIZ philanthropy** and receive additional sponsoring from **DEME** and **Antea Group**.

[DEME](#) is a world leader in the specialised fields of dredging, solutions for the offshore energy industry, infra marine and environmental works. The company can build on more than 140 years of know-how and is a front runner in innovation and new technologies. DEME’s vision is to work towards a sustainable future by offering solutions for global challenges: a rising sea level, a growing population, reduction of CO2 emissions, polluted rivers and soils and the scarcity of natural resources. DEME can rely on 5.200 highly skilled professionals and a modern fleet of over 100 vessels.

[Antea Group](#) is an international (engineering) consultancy, specialised in full-service solutions in the fields of infrastructure, the environment, urban planning and water. In Belgium alone, more than 220 specialists work to develop multidisciplinary solutions to complex problems. Antea Group works towards building a better future, together with their customers.

The grant for a ‘**Brilliant Marine Research Idea**’ for predocs in the South is intended to inspire and enable **PhD students working in a southern non-European country*** while having a strong connection to a Flemish Marine Research Group, a Flemish university or a Flemish university college by

- having obtained an international master’s degree from a Flemish university**, or
- having a doctoral grant, half awarded by a Flemish Marine Research Group or university combined with the financing of the other half by a partner institution or university in the South (so called “sandwich grant”).

The grant serves to execute a brilliant idea during their PhD within the frame of their research. It should concern **an out of the box idea, an additional research topic that was initially not foreseen in the PhD, but that would add an extra value to the ongoing research.**

For 2021, **VLIZ philanthropy** offers **one grant** to a predoc in the South for his/her 'Brilliant Marine Research Idea'. VLIZ philanthropy seeks to fund a marine research idea that can contribute to solving a hypothesis-based marine research question. Topics of interest are (amongst others) the themes identified in the philanthropy research agenda including pollution, ocean and human health, marine biodiversity, climate change, ocean related disasters and marine explorations.

For 2021, **VLIZ philanthropy** has the honour to receive **sponsoring** for the 'Brilliant Marine Research Idea' grants from **DEME** and from **Antea Group**.

Framed within the area of interest of the company, **DEME** sponsors a BMRI grant for a research topic situated in engineering & technology, fisheries & aquaculture sciences, economic sciences or biological sciences.

Framed within the interest of the company, **Antea Group** sponsors a research topic related to coastal engineering and hydrodynamics, or microplastics research.

More specifics can be read on page 7.

The fund of maximum 5.000 EUR can be used to assist PhD students in lab and/or fieldwork, data acquisition and analysis, visits to other institutes to use specialized facilities, acquisition of equipment or software needed for a certain analysis and so on. The fund cannot be used to reimburse the use of existing lab infrastructure within your research group/department, for personnel costs, to pay for travel costs that amount to more than 50% of the grant or to attend conferences.

Budget and implementation period

The overall budget available for the grants is 5.000 EUR from VLIZ philanthropy with the financial support of the sponsors DEME and Antea Group.

The grant will be awarded to the successful applicant personally and the terms and conditions (including a short report) of the award will be discussed and negotiated prior to the implementation of the idea.

The proposed idea has to be executed within one year. The selection of the ideas will take place before 15 February 2021. The successful applicants can start their activities from 1 March 2021 and complete them by 28 February 2022.

Eligibility and selection criteria

Eligibility of applicant

- PhD student with, at the time of application, less than 6 years of research experience at predoc level (i.e. since starting PhD research) working in a southern non-European country*
- Having a strong demonstrable link with a Flemish Marine Research Group, Flemish university or a Flemish university college by having obtained an international master's degree from a Flemish university** or having a doctoral grant, half awarded by a Flemish Marine Research Group or university combined with the financing of the other half by a partner institution or university in the South (so called "sandwich grant").
- Consent of the university (college) supervisor

Eligibility of budget and implementation period

- Maximum request for 5.000 EUR
- Maximum duration of 1 year
- Implementation between 1 March 2021 and 28 February 2022

Eligibility of activities and related costs

The grant (budget allocated by VLIZ) includes all possible university/institute 'overhead' or other costs, i.e. no additional will be accepted.

- The grant is used to finance local costs (within the country where the student runs his/her PhD research)
- No personnel costs
- No conference fees
- No reimbursement of the use of existing lab infrastructure within your research group or department
- Travel costs cannot amount to more than 50% of the grant
- The research topic should concern an out of the box idea, an additional research topic that was initially not foreseen in the PhD, but that would add an extra value to the ongoing research
- Recommended:
 - the research topic is unique and relevant for the country which is proved by publications
 - the research results in a strengthening of the collaboration with the connected Flemish Marine Research Group by e.g. contributing, to a database, a project, a publication, etc.

Eligibility of research domain for the VLIZ philanthropy BMRI grant

Topics of interest are marine related and are (amongst others) the themes identified in the philanthropy research agenda including pollution, ocean and human health, marine biodiversity, climate change, ocean related disasters and marine explorations.

Eligibility of research domain for the BMRI grant sponsored by DEME

The eligible topics are marine related and fit within one of the following descriptions, ranked according to decreasing preference:

1. Engineering and technological sciences (including civil engineering)

- 1.1. Coastal engineering and hydrodynamics
 - 1.1.1. Nature inspired solutions for coastal management (protection)
 - 1.1.2. Nature inspired beach protection solutions for a more sustainable coast management
- 1.2. Multi-use of space / marine spatial planning
 - 1.2.1. Renewable energy / aquaculture / others
- 1.3. Ammunition dumps solutions
- 1.4. Microplastics solutions
- 1.5. Offshore (geotechnical) engineering - sustainable scour protection

2. Fisheries & aquaculture sciences

(Seaweed) aquaculture in offshore wind farms

3. Economic sciences

Bringing nature inspired solutions up to a mature business level

4. Biological sciences

- 4.1. Effect sound on marine mammals – offshore works
- 4.2. Eolic sand transport and influence on dune management

Eligibility of research domain for the BMRI grant sponsored by Antea Group

1. Coastal engineering and hydrodynamics with a focus on:

- European coasts & estuaries
- African west coast (threats from coastal erosion)
- Micronesia (threats from environmental pollution & climate change, rising sea levels)

2. Microplastics

Research proposals relating to the observation, behavior, data processing and modeling of plastics inside (and outside) estuaries.

Eligibility of submission modalities

Timely and complete submission.

Selection procedure

After the deadline has passed, the scientific board of VLIZ together with representatives of DEME and Antea Group will evaluate the submitted applications and make a final selection. The jury has the right to withhold the grants, if it decides that none of the proposed proposals can be taken into consideration.

All applicants will be personally informed about the success of their proposal.

The grants are awarded during the VLIZ Marine Science Day on 3 March 2021. Successful applicants will be invited to send in a short video as a way to present their work at the VLIZ Marine Science Day 2022.

How to submit an application?

Applicants can apply for the grant by sending **following documents** to filantropie@vliz.be:

- application form ([available on this link](#))
- cv of the PhD student
- letter of consent of the supervisor affiliated to the student's university or university college (free format)
- recommendation letter of the scientist with whom the student is strongly connected at a Flemish Marine Research Group, a Flemish university or a Flemish university college (free format)
- if relevant: a copy of the diploma of the international master program followed at a Flemish university

Subject of the e-mail: Proposal for a 'Brilliant Marine Research Idea' 2021 (predoc South)

Submission deadline: 29 January 2021

*** Annex 1: Countries eligible for a BMRI grant for predoc researchers in the South**

Africa	Middle & South America	Asia & Oceania
Algeria	Antigua and Barbuda	Bangladesh
Angola	Argentina	Cambodia
Benin	Belize	China
Cameroon	Brazil	Cook Islands
Comoros	Colombia	Democratic Republic of Korea
Congo	Costa Rica	Fiji
Democratic Republic of Congo	Cuba	Philippines
Djibouti	Dominica	India
Equatorial Guinea	Dominican Republic	Indonesia
Eritrea	Ecuador	Kiribati
Gabon	El Salvador	Laos
Gambia	Grenada	Maldives
Ghana	Guatemala	Malaysia
Guinea	Guyana	Marshall Islands
Guinea Bissau	Haiti	Micronesia
Ivory Coast	Honduros	Myanmar
Kenya	Jamaica	Nauru
Liberia	Cape Verde	Niue
Libya	Mexico	Palau
Madagascar	Montserrat	Papua New Guinea
Morocco	Nicaragua	Samoa
Mauritania	Panama	Solomon Islands
Mauritius	Peru	Sri Lanka
Mozambique	Saint Helena	Thailand
Namibia	Saint Lucia	Timor-Leste
Nigeria	Saint Vincent & the Grenadines	Tokelau
Sao Tome & Principe	Suriname	Tonga
Senegal	Venezuela	Tuvalu
Sierra Leone		Vanuatu
Sudan		Vietnam
Somalia		Wallis and Futuna
Tanzania		
Togo		
Tunisia		
South Africa		

**** Annex 2: International master's programs with a marine component that qualify for the BMRI grant at predoc level for researchers in the South**

- [Oceans & Lakes](#)
- [International Master in Marine Biological Resources \(IMBRSea\)](#)
- [International Master of Science in Agro- and Environmental Nematology \(IMaNema\)](#)
- [Master of aquaculture](#)
- [Tropimundo](#)
- [Interuniversity Programme in Water Resources Engineering \(IUPWARE\)](#)
- [Master of Sustainable development](#)
