

POST-DOC PRESENTATIONS

The following pages contain the abstracts of the post-doc oral presentations, in the same order as the programme:

1. **Tom Van der Stocken** - Modeling mangrove propagule dispersal trajectories using high-resolution estimates of ocean surface winds and currents 31
2. **Loïc Michel** - Increased sea ice cover disrupts food web structure in coastal Antarctica 32
3. **Annelies De Backer** - Extremely loud and incredibly close: in situ exposure of Atlantic cod to pile driving 33
4. **Filip Osaer** - Angelshark-ID: Photo-identification as a non-invasive monitoring tool ... 34
5. **Bart De Smet** - The community structure of deep-sea macrofauna in an area of interest for deep-sea mining 35
