

PRE-DOC PRESENTATIONS

The following pages contain the abstracts of the pre-doc oral presentations, in the same order as the programme:

| | | |
|-----|---|----|
| 1. | Africa Barrios Trullos - Carbon-neutral silviculture in Matang Mangrove Forest Reserve (Malaysia): a becoming reality?..... | 7 |
| 2. | Alice Cransveld - Mercury stable isotopes discriminate different populations of common Seabass around Europe and provide insight on mercury cycle..... | 8 |
| 3. | Sander De Bock - Diving response: an argument for the Aquatic Ape Theory in human evolution? | 9 |
| 4. | Maikel De Clercq - Late Pleistocene palaeogeographical evolution of the southern North Sea..... | 10 |
| 5. | France Damseaux - A meta-analysis of isotopic compositions of North Sea marine mammals..... | 11 |
| 6. | Reinhoud De Blok - Phaeocystis blooms in the Belgian coastal zone - Routine phytoplankton monitoring with the cytosense flowcytometer | 12 |
| 7. | Brecht Devolder - Numerical modelling of wave interaction with coastal and offshore structures using a CFD solver..... | 13 |
| 8. | Evelien De Swaef - Development of the first standardized biotic challenge model for Dover Sole (<i>Solea solea</i>) and its validation by assessing the protective potential of probiotic candidates..... | 14 |
| 9. | Lisa Devriese - With a pinch of salt: microplastics and trace elements in sea salts for human consumption | 15 |
| 10. | Caroline Echappé - The relationship between oysters and microscopic benthic algae revealed by satellite remote sensing..... | 16 |
| 11. | Nils Lowie - Evaluation of the sand extraction impact on the seabed and the water column at short time and space scale in an intensively dredged area of the Belgian part of the North Sea by using multibeam echosounder bathymetric, backscatter strength and water column data..... | 17 |
| 12. | Tara Grosemans - Detection and degradation of environmental DNA (eDNA) in the marine environment: a lab and field approach using plaice | 18 |
| 13. | Sandra Maier - Survival in a feast-famine environment: Resource utilization, storage and recycling in cold-water coral reefs | 19 |
| 14. | Roeland T'Jampens - Automatic monitoring of birds in marine video content | 20 |
| 15. | Sebastiaan Van de Velde - The impact of dredging on the geochemical cycling in coastal ecosystems | 21 |
| 16. | Emmanuel Van Acker - Phycotoxins in sea spray aerosols: friend or foe?..... | 22 |
| 17. | Magdalene Ngeve - Patterns of regional- and local- scale genetic connectivity in Eastern Atlantic mangroves | 23 |

| | | |
|-----|---|----|
| 18. | Ee Zin Ong - Interactive effects of next-century ocean acidification and warming on the common cockle <i>Cerastoderma edule</i> | 24 |
| 19. | Brigitte Heylen - Tracking a marine predator to design flexible boundaries of marine protected areas for an ecosystem approach to fisheries | 25 |
| 20. | Maike Vercauteren - Visualization of small lesions in skin of fish using fluorescein dye | 26 |
| 21. | Gael Verao Fernandez - Coupling methodology for modelling the near field and far field effects of an array of Wave Energy Converters | 27 |
| 22. | Benigna Van Eynde - First steps to rear Crangon crangon larvae successfully in captivity | 28 |
| 23. | Mike Van 't Land - Determining nutritional quality and chemical changes during storage of fish silage produced using different combinations of undersized quota species..... | 29 |
