

Best oral presentation award 2011

VLIZ Young Marine Scientists' Day

site Oud Sint-Jan (25 February 2011)

Kindly find below the alphabetical list of the oral 'pitching' presentations, tick your **top three** and turn in the form when leaving the plenary session room at **12:30**.

	Baeye Matthias Sediment mobility in response to tidal and wind-driven flows along the Belgian coast, southern North Sea
	Boets Pieter Influence of alien macro-crustacea (Malacostraca) on macroinvertebrate assemblages in Belgian coastal harbours
	De Laender Frederik Cocktails in the Arctic: are the polar bears loaded yet?
	Desnerck Elien Burchtse Weel: reducing the tide differently
	Hollants Joke The Art Nouveau of biology: exhibiting seaweed-bacterial symbioses
	Houziaux Jean-Sébastien A muddification of the Belgian coastal waters? Shifts in the distribution of 12 numerically abundant bivalves over the twentieth century
	Moreau Kelle Genetic structure and life history as basis for management units in turbot <i>Psetta maxima</i>
	Pede Annelies Impact of phytoplankton bloom deposition on microbial communities and metal fluxes in contaminated North Sea sediments: a microcosm study
	Reubens Jan Site fidelity and movements of cod (<i>Gadus morhua</i>) at a wind farm using acoustic telemetry
	Satyanarayana Behara Fate of the predictions in Galle-Unawatuna mangroves, Sri Lanka: a validation after 10 years using satellite (IKONOS) and ground-truth data
	Schnitzler Joseph G. Thyroid hormone disrupting chemicals in sea bass (<i>Dicentrarchus labrax</i>) from European coasts
	Stratigaki Vasiliki Large scale experimental investigation on waves-vegetation interaction
	Van Ael Evy Distribution and bioaccumulation of micropollutants in an estuarine ecosystem
	van Oostende Nicolas Bacterial community structure and potential controlling factors along a water column stratification gradient during multi-annual coccolithophorid blooms
	Vanelslander Bart Chemical warfare between microalgae: biogenetic Bromine cyanide (BrCN) controls biofilm formation around a marine benthic diatom
	Vanhove Daan Assessing paleotemperature and seasonality during the early Eocene climatic optimum (EECO) in the Belgian basin by means of fish otolith stable O and C isotopes
	Vermeersch Jeroen The cogs from Doel. Multidisciplinary research on two medieval shipwrecks
	Wallès Brenda The use of an ecosystem engineer in coastal defense
	Zhou Jiayun Dynamic processes in sea ice captured by the temporal evolution of its biogeochemical properties
