

# ***European Marine Research Infrastructures for the next Decade***

Rudy Herman<sup>1</sup> & Hervé Pero<sup>2</sup>

<sup>1</sup> Department of Economy, Science and Innovation  
of the Flemish Government (EWI), Belgium

<sup>2</sup> European Commission, Directorate-General for Research

# Basics of the development of the European Research Area

The ERA concept combines:

- a European "internal market" for research, where researchers, technology and knowledge freely circulate;
- an effective European-level coordination of national and regional research activities, programmes and policies;
- initiatives implemented and funded jointly

# World-class research infrastructures

cf. Lund & Donostia declarations (July 09 – Jan 10)

- Essential for Europe's researchers to stay at the forefront of research development
- Key component of Europe's competitiveness in "frontier" research

## *Key Challenges:*

- *Overcoming fragmentation in Europe*
- *Coping with increasing costs / complexity*
- *Improving efficiency of (and access to) research services, incl. e-infrastructures*

# Scientific competition is at world level

- Is Europe able to face the challenge?
- Are member States willing to think European?

**reinforcing coordination / integration is the  
only possible choice for RI policy at EU level**

- At EU level,
- At national and regional,
- At global level...

*This explains the important  
role of ESFRI and others...*

# Role of ESFRI

*(and of its ad-hoc Working Groups)*

- To foster an “open method of coordination” between different countries
- To discuss the long term vision at European level and to support the development of a European RI policy
- To bring initiatives and projects to a point where decisions by ministers are possible

First roadmap  
in 2006

Update in  
Dec 2008

Update in  
Dec 2010

*A stimulation  
and incubator role*

# Research infrastructures for marine and maritime research

- Ad Hoc ESFRI working group, “European Strategy on Marine Infrastructure”, 2003
- Thematic ESFRI working group (Environment)
- Marine board, policy statements and position papers
- The Aberdeen declaration, EurOCEAN 2007 conference:  
“...shared use, planning and investment of critical infrastructure on a European-wide basis”
- EC Communication “A European Strategy for Marine and Maritime Research”
  - ✓ Expert group on MRI (chair: Rudy Hermann)

EUROPEAN  
COMMISSION

Community research

# e-Infrastructures interconnecting communities

e-infrastructure

European Commission  
Information Society and Media

**EUROPEAN**  
**Euro** OCEAN  
2010

Thermae Palace (Oostende, Belgium, 12-13 October 2010)

EUROPEAN  
COMMISSION

Community research

# Towards an 'eco-system' of Research Infrastructures within ERA

- Large (single-sited) facilities
- Distributed European Facilities
- Network of national facilities

Based on

- a consistent roadmap  
from the European stakeholders
- Links with universities & schools
- Network of industrial suppliers / users

**EuroOCEAN**  
2010

Thermae Palace (Oostende, Belgium, 12–13 October 2010)

**Joint Programming  
Open Access**

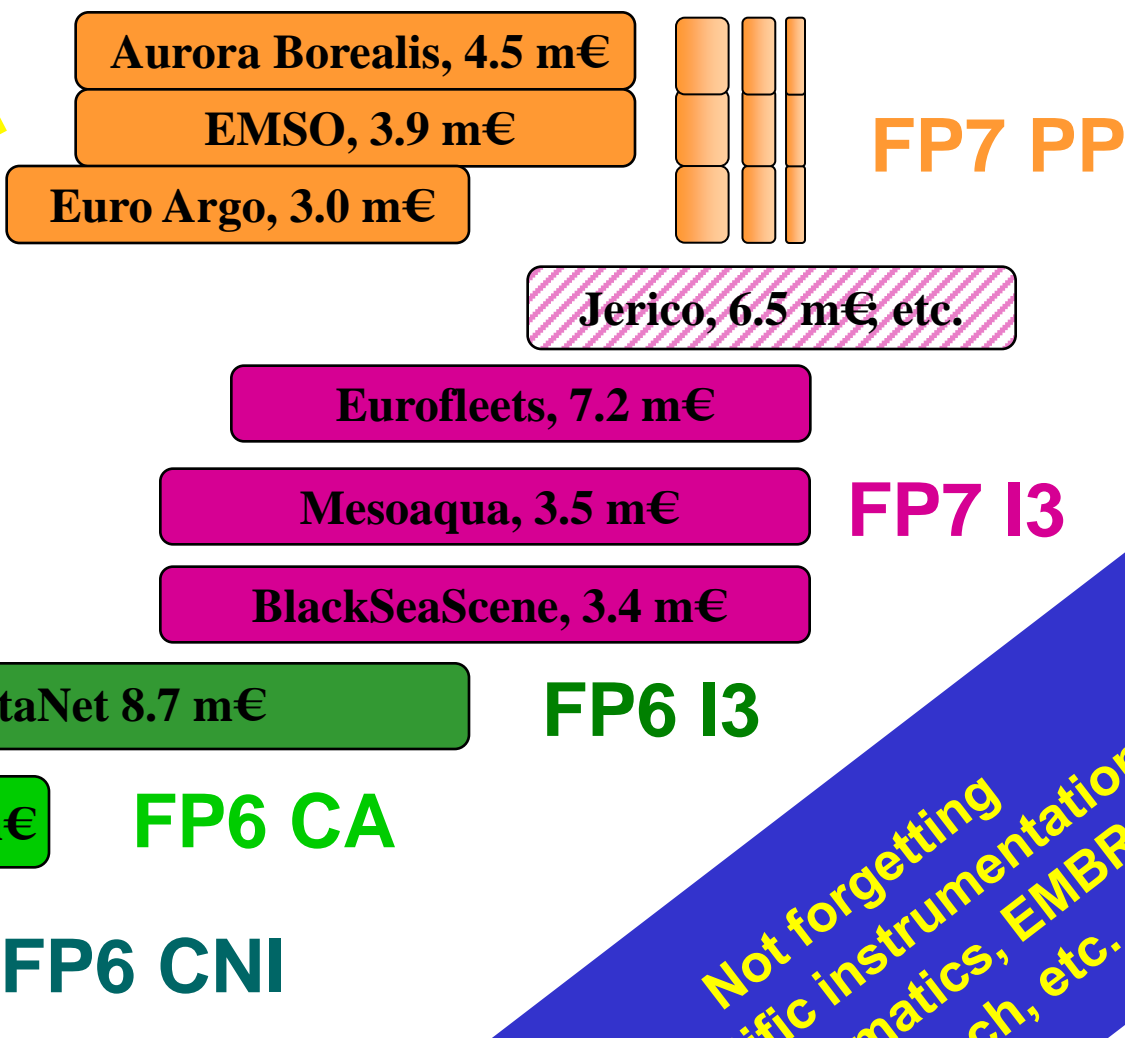

EUROPEAN COMMISSION

Community research

# RIs for Marine sciences

## FP6+7

About 60M€ of EC funding (2005-2012)

Not forgetting scientific instrumentation, bio-informatics, EMBRC, Lifewatch, etc.

Thermae Palace (Oostende, Belgium, 12-13 October 2010)

Marine Research Infrastructures  
consists of a plenitude of  
multifunctional equipment,  
instrumentation platforms  
and solid or virtual constructions  
serving a broad range of  
multidisciplinary user communities

# ESFRI: fostering integration of and interaction of MRI

Research Vessels  
Underwater vehicles  
Large exchangeable  
Instrumentation  
Fixed & Distributed  
Observatories  
Data- & information  
Centres,  
Virtual Labs  
Skilled Technicians &

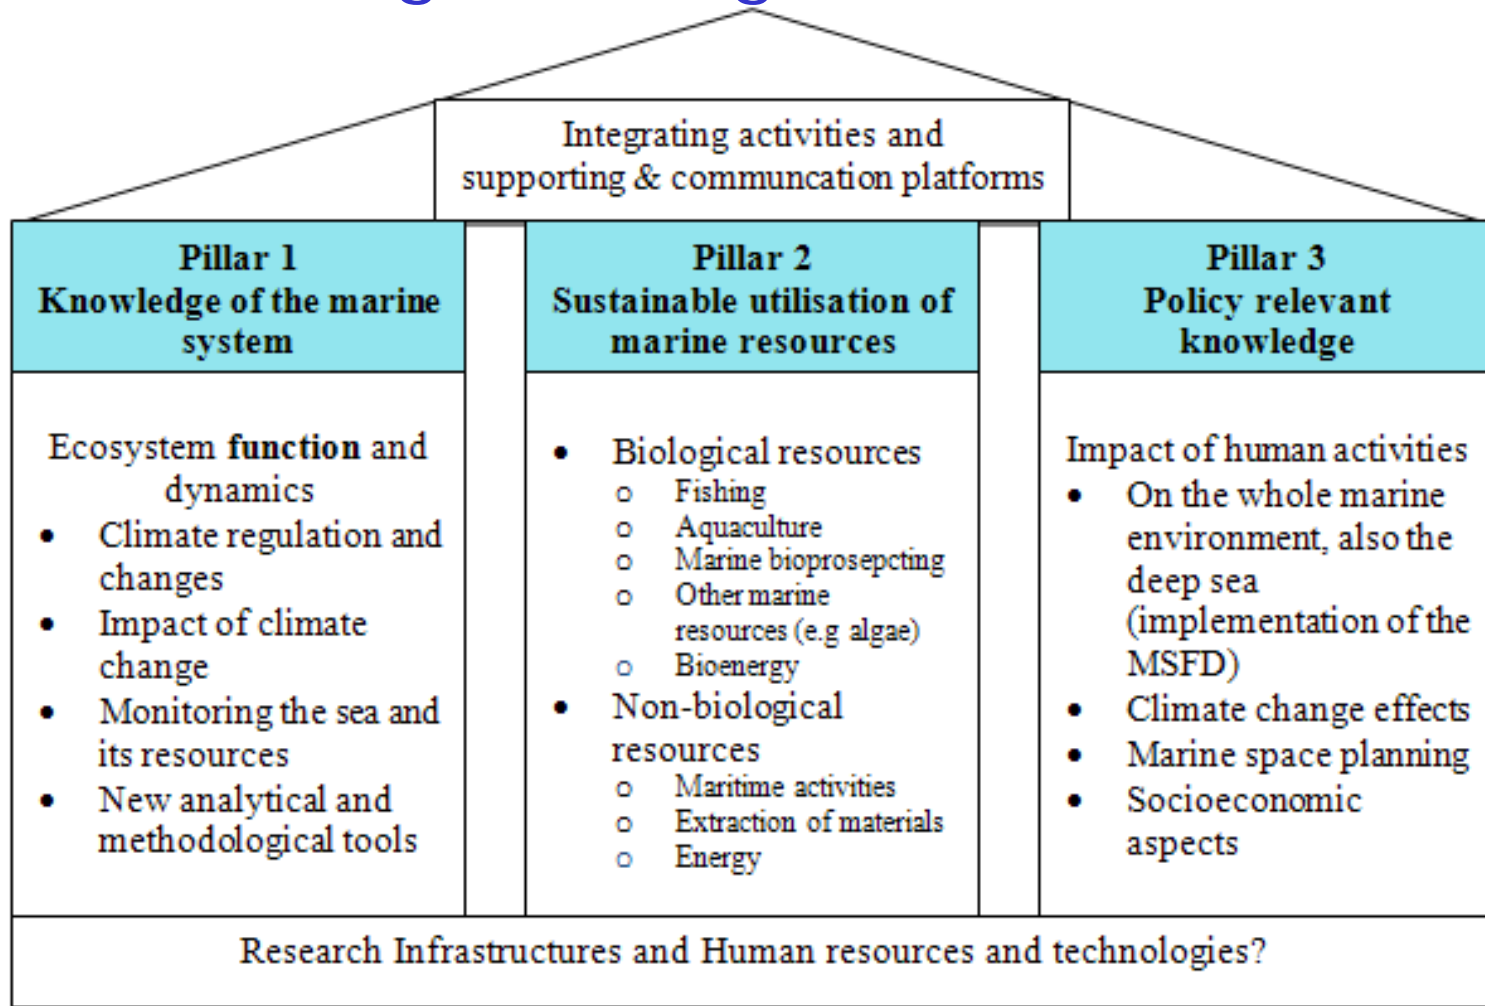

- **ERICON-AB**, European Polar Research Icebreaker- Aurora Borealis
- **EMSO**, European Multidisciplinary Seafloor Observatory
- **EURO-ARGO**, Research infrastructure for ocean science and observations
- **ICOS**, Integrated Carbon Observation System
- **LIFE WATCH**, Science and technology infrastructure for biodiversity data and observatories
- **SIOS**, Svalbard

High Quality  
Researchers

Thermae Palace (Oostende, Belgium, 12–13 October 2010)

## Joint Programming Initiative 'Oceans'

| Policy / Societal needs e.g.                      |  | Potential MRI                                   |   |
|---|--|---|---|
| <p><b>Marine Strategy Framework Directive</b></p> | <ol style="list-style-type: none"> <li>1. Biodiversity, alien species, fish stocks, food webs, seabed integrity / habitats</li> <li>2. Eutrophication</li> <li>3. Hydrographical conditions</li> <li>4. Contaminants</li> <li>5. Litter – 6. Noise / Energy</li> </ol> | <p><b>E</b></p> <p><b>M</b></p>                 | <ul style="list-style-type: none"> <li>• EMSO, EUROSITES?</li> <li>• Ships of opportunity?</li> <li>• Mapping of Seabeds / habitats?</li> <li>• LIFEWATCH?</li> <li>• EUROFLEETS?...</li> <li>• <i>Regional Networks</i></li> </ul> |
| <p><b>Ocean / Climate Interactions</b></p>        | <ol style="list-style-type: none"> <li>1. Ocean circulation system, ocean / atmosphere interactions</li> <li>2. Impact of climate change on marine environment</li> <li>3. Impact of climate ch. on coastal areas</li> </ol>   | <p><b>O</b></p> <p><b>D</b></p>                 | <ul style="list-style-type: none"> <li>• EURO-ARGO?</li> <li>• RAPID-ARRAY?</li> <li>• PIRATA?</li> <li>• TENATSO?</li> <li>• GLOSS-ESEAS?...</li> </ul>  |
| <p><b>Operational Oceanography</b></p>            | <ol style="list-style-type: none"> <li>1. Marine safety</li> <li>2. Marine and coastal environment</li> <li>3. Weather / climate &amp; seasonal forecasting</li> <li>4. Marine resources</li> </ol>  | <p><b>N</b></p> <p><b>E</b></p> <p><b>T</b></p> | <ul style="list-style-type: none"> <li>• GMES marine RS</li> <li>• GMES in situ <ul style="list-style-type: none"> <li>• EURO-ARGO</li> <li>• EMSO</li> <li>• LIFEWATCH?</li> </ul> </li> </ul>                                     |

## **Recent declarations from the Marine Board much welcome:**

Need for “a long term, stable and integrated network of strategic marine observatories, installed and operated through multi-national cooperation and support, providing consistent in situ data from seas and oceans in support of the EU Integrated Maritime Policy and as a driver for smart, sustainable and inclusive growth in Europe”.

“Long term time series datasets from the marine environment are of critical importance”

## Key challenges for Marine Research including Research Infrastructures

- Building on former and ongoing initiatives (incl. ESFRI, ERANET SEAS-ERA), no other choice than fostering European approach, build a long-term vision and... act! Joint Programming Initiative “Oceans” will mature and deserves formal long term commitments.
- RIs: although they are serving essential research (and monitoring) and addressing grand challenges, there is still need to develop, reach sustainability and move to pan-European strategy and governance

## Key challenges for Marine Research including Research Infrastructures

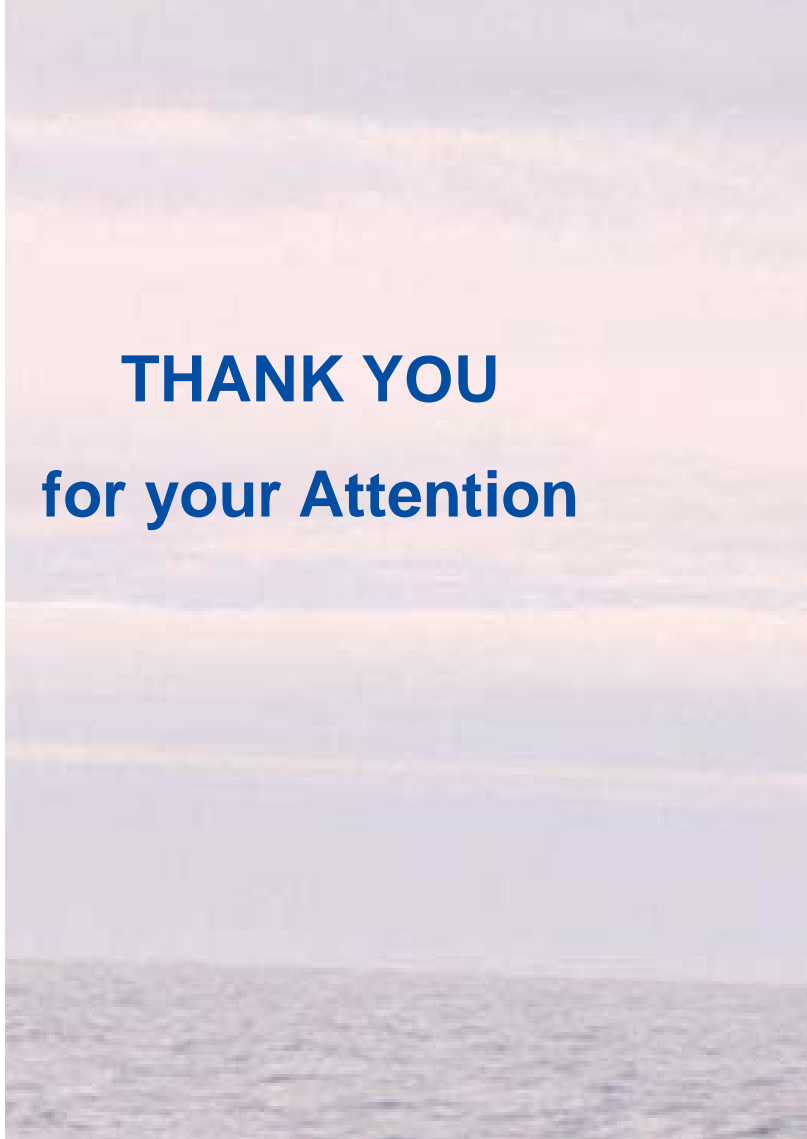

- A “European Ocean Observing System” (without s) can only be envisaged if all stakeholders agree on objectives and priorities... on pooling resources... and fill the gaps!
- The relevant cyber-infrastructures are progressing but still a lot to do towards full open access to data, interoperability (incl. GEOSS compatibility) and full use of e-services (grid, GEANT, high-performance computing)
- Capacity and willingness (or not) to *work together* to face more complex problems and research internationalization
