

A Check List of the Ostracoda of New Zealand

Abstract

A check list of all living species of Ostracoda so far recorded from New Zealand, with revised names, is given in taxonomic order. A complete bibliography is included.

INTRODUCTION

THE study of the living Ostracoda to be found in and around New Zealand has been pursued, for the most part, by workers of diverse nationalities and the resulting descriptions are to be found in equally diverse, and sometime obscure, publications. For this reason it is time-consuming and laborious to trace the various records of the species which have been described. However, some efforts have been made in the present century to remedy the situation. Hutton (1904) was the first person to gather the records of the species of the New Zealand fauna and within it he listed some forty-seven species of Ostracoda. This record was accurate for the period covered. A lesser attempt was made by Benson (1965), but his list included only the marine Podocopida and Platycopida and was incidental to his primary study which was of a biogeographical and environmental nature. The list is not complete, even for these orders. The lists of species given in Hornibrook (1952a) under the headings of origin, distribution and affinities, although in themselves useful, were only for the species encountered in his samples. Hornibrook (1952c) analysed, but did not list, the living marine Ostracoda in terms of their fossil record and was of the opinion that the Recent fauna "was established well back in the Tertiary". A review of the freshwater species by Chapman (1963) included a check list which again was incomplete, for two more species were known at that time. Barclay (1968), together with the present list makes the necessary additions.

The geographical limits of the species under consideration are as bounded by the chart "New Zealand Bathymetry" (Lawrence, 1967) with the exception of the islands in the north-west and south-west. The check list below has been arranged in taxonomic order. It will be seen that there is much scope for work on the taxa as several of them are left under open nomenclature, while other species await the election of lectotypes, and many still require figuring and describing fully. This is not an exhaustive list of synonymies, nor, indeed, of every reference to a particular species, since only those references pertinent to the New Zealand fauna are included. The end of the year 1969 has been used as a terminus; a revision of this list will, therefore, date from the commencement of 1970.

TAXONOMY

Certain names have only provisional taxonomic placings because of the nature of their references. These names are indicated by an asterisk. New combinations are marked with a dagger.

Order MYODOCOPIDA Sars, 1866

Suborder MYODOCOPINA Sars, 1866

Superfamily Cypridinacea Baird, 1850

Family CYPRIDINIDAE Baird, 1850

Subfamily Cypridininae Baird, 1850

Genus *Azygocypridina* Sylvester-Bradley, 1950†*Azygocypridina zealanica* (Baird): *Cypridina zealanica* Baird, 1850; Baird, 1852; *Crossophorus imperator* Brady, 1880.Genus *Bathyvargula* Poulsen, 1962*Bathyvargula walfordi* Poulsen: *B. walfordi* Poulsen, 1962.Genus *Codonocera* Brady, 1902*Codonocera crueta* Brady: *C. crueta* Brady: Barney, 1921.Genus *Cypridinoides* Poulsen, 1962*Cypridinoides reticulata* Poulsen: *C. reticulata* Poulsen, 1962.

Genus **Macrocypridina** Skogsberg, 1920

Macrocypridina castanea (Brady) var. **rotunda** Poulsen: *M. castanea* var. *rotunda* Poulsen, 1962.

Genus **Paracypridina** Poulsen, 1962

Paracypridina aberrata Poulsen: *P. aberrata* Poulsen, 1962.

Family PHILOMEDIDAE Müller, 1912

Subfamily Philomedinae Müller, 1912

Genus **Euphilomedes** Poulsen, 1962

Euphilomedes agilis (Thomson): *Philomedes agilis* Thomson, 1879; Brady, 1897; Brady, 1898; Thomson, 1921.

Genus **Streptoleberis** Brady, 1890

†**Streptoleberis flexilis** (Brady): *Philomedes flexilis* Brady, 1898; *Scleroconcha flexilis* (Brady) Poulsen, 1962.

†**Streptoleberis sculpta** (Brady): *Philomedes sculpta* Brady, 1898; Thomson, 1921.

†**Streptoleberis arcuata** (Poulsen): *Scleroconcha arcuata* Poulsen, 1962.

Family SARSIELLIDAE Brady and Norman, 1896

Genus **Muelleriella** Poulsen, 1965

†**Muelleriella? hanseni** (Brady): *Sarsiella hanseni* Brady, 1898.

Muelleriella hispida (Brady): *Sarsiella hispida* Brady, 1898.

Muelleriella zealandica Poulsen: *M. zealandica* Poulsen, 1965.

Family CYLINDROLEBERIDIDAE Müller, 1906

Genus **Cylindroleberis** Brady, 1867

†**Cylindroleberis? grisea** (Brady): *Asterope grisea* Brady, 1898.

Genus **Dolasterope** Poulsen, 1965

Dolasterope johanseni Poulsen: *D. johanseni* Poulsen, 1965.

Genus **Parasterope** Poulsen, 1965

†**Parasterope australis** (Brady): *Asterope australis* Brady, 1898; Thomson, 1921; Hornibrook, 1952a.

Parasterope pectinata Poulsen: *P. pectinata* Poulsen, 1965.

Genus **Synasterope** Poulsen, 1965

Synasterope quadrata (Brady): *Asterope quadrata* Brady, 1898; *Synasterope quadrata* (Brady) Poulsen, 1965.

Genus **Cycloberis** Skogsberg, 1920

Cycloberis tenera (Brady): *Cyclasterope zealandica* (Baird) Brady, 1898; *Cyclasterope tenera* Brady, 1898.

Cycloberis bradyi Poulsen: *C. bradyi* Poulsen, 1965.

Cycloberis lobiancoi (Müller): *Cyclasterope lobiancoi* (Müller) Barney, 1921.

Cycloberis ovulum (Brady): *Cyclasterope ovulum* Brady, 1898.

Superfamily Halocypridacea Dana, 1852

Family HALOCYPRIDAE Dana, 1852

Genus **Halocypris** Dana, 1852

Halocypris inflata Dana: *H. inflata* Dana; Barney, 1921.

Halocypris globosa (Claus): *H. globosa* (Claus) Barney, 1921.

Genus **Conchoecia** Dana, 1849

Conchoecia acuticostata Müller: *C. acuticostata* Müller; Barney, 1921.

Conchoecia chuni Müller: *C. chuni* Müller; Barney, 1921.

Conchoecia belgicae Müller: *C. belgicae* Müller; Barney, 1921.

Conchoeria bispinosa Claus: *C. bispinosa* Claus; Barney, 1921.

- Conchoecia daphnoides daphnoides* (Claus): *C. daphnoides daphnoides* (Claus) Barney, 1921.
Conchoecia discophora Müller: *C. discophora* Müller: Barney, 1921.
Conchoecia serrulata laevis Brady: *C. serrulata laevis* Brady: Barney, 1921.
Conchoecia serrulata serrulata Claus: *C. serrulata serrulata* Claus: Barney, 1921.
Conchoecia spinirostris Claus: *C. spinirostris* Claus: Barney, 1921.
Conchoecia subarcuata Claus: *C. subarcuata* Claus: Barney, 1921.
Conchoecia stigmatica Müller: *C. stigmatica* Müller: Barney, 1921.

Suborder Cladocopina Sars, 1866

Family POLYCOPIDAE Sars, 1866

Genus *Polycope* Sars, 1866

Polycope 2 n.spp.: *Polycope* 2 spp. Hornibrook, 1952a.

In addition there are a number of species of unknown affinities. They are:—

- Cypris bennelong* King: Sars, 1894.
Cytherideis hedleyi Chapman, 1906; Hornibrook, 1952a.
Cypridina danae Brady: Chapman, 1906.
Cythere cancellata Brady: Chapman, 1906.
Cythere crispata Brady: Chapman, 1906.
“*Cythere*” *exilis* Brady: Hornibrook, 1952a.
Cythere prava Baird: Chapman, 1906.
