

THE MARINE AND BRACKISH-WATER ISOPODA (ARTHROPODA, CRUSTACEA) FROM
BELGIUM

by Guido RAPPE
(Kapelstraat 3, 9890 Ursel)

60685

This is the first checklist of the Belgian species of marine and brackish-water Isopoda. The list is an up-to-date revision of the study of Holthuis (1950). Many species of this study had to be omitted, as Holthuis included data from a considerable part of the southern North Sea and from the eastern entrance of the Channel. Recently some additions to the Belgian fauna have been made.
