Helping Teachers

Provide administrative support for training organizers:

- **Advertizing**
- **Subscription management**
- **Publication of training material**
- **Online learning platform**

Helping Students

Helping Master and PhD students as well as professionals to find suitable trainings to develop marine related skills. Including:

- **Master and PhD programmes**
- **Doctoral trainings**
- **Lifelong learning courses**

The story so far...

The EMBRC Training portal is still a work in progress. A prototype of the database has been developed and is allready available at <http://www.embrc.ugent.be>.

We have started populating the database with data on training programs related to marine sciences from all Belgian universities. For Ghent University we expanded the focus to individual courses, to have an idea of what is available in marine sciences and to identify gaps in the offer. In the future we aim to bring together all marine orientated training opportunities in Europe to support tomorrows marine professionals.

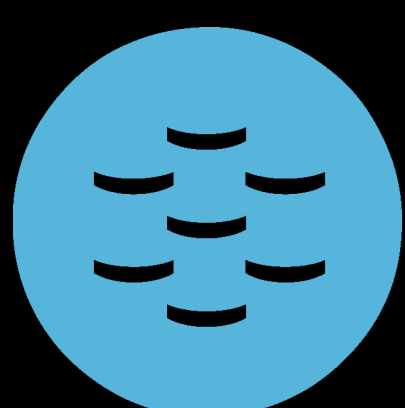

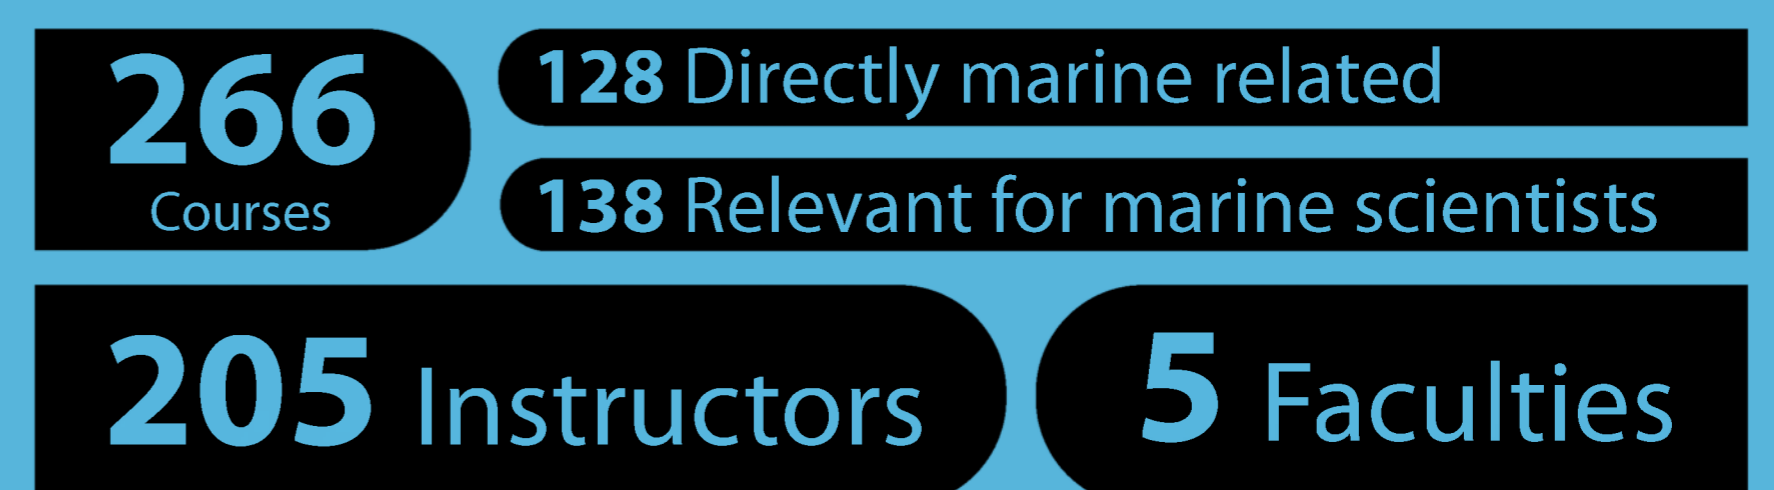

Belgium as a case study

Marine Orientated Master Programmes in English

Marine Orientated Courses at Ghent University
