EXPLANATORY NOTES

Fishing Vessels

Unless otherwise stated, fishing vessels are shown in registered lengths.

Shrimps and Cockles

From 1st January 1962 the landings of shrimps and cockles have been recorded separately, instead of being included with "other shell fish" as previously.

Periwinkles

From 1st January 1966 the landings of Periwinkles have been recorded separately, instead of being included with "other shell fish as" previously.

Classification of Squids

In the tables for 1954 and earlier years, squids were classified as demersal fish. It was decided in view of the zoological classification of squids as members of the mollusc group that it was more appropriate for statistical purposes to classify them as shell fish. Effect has been given to that decision in the tables from 1955.

DIGEST OF SCOTTISH STATISTICS

No. 33 - April 1969

Price 1 ls. 0d. per copy

THIS 66-page Digest is prepared half-yearly by the Scottish Statistical Office, St. Andrew's House, Edinburgh, in collaboration with the Statistics Divisions of Government Departments. Apart from the more obvious statistics it includes information on capital expenditure and cost and proceeds of the nationalised fuel industries, road and canal transport, local authorities' income and expenditure, inland revenue duties, civil and licensing courts and the weather.

The wide scope of the Digest makes it of value to industrialists, business executives, economists, journalists and all who are interested in the social economy of Scotland. A feature of the Digest is the quarterly index of Industrial Production giving a measure of the changes since 1958 in the volume of output of a wide range of Scottish industries.

The statistical information is arranged under the following headings.
