Ministry of Agriculture and Fisheries,
 Fisheries Department,
 43, Parliament Street,
 London, S.W.1.

March, 1929.

To the Minister of Agriculture and Fisheries.

Sir,

I have the honour to submit herewith the statistical tables relating to Sea Fisheries for the year 1928. Apart from minor changes, the form and contents of the Tables are similar to those for 1927.

The total quantity of wet fish of British taking landed in England and Wales during the year was 13,444,000 cwts., valued at £13,184,000, as against 13,080,000 cwts., valued at £12,705,000 in 1927—an increase of 3 per cent. in quantity, and of 4 per cent. in value.

The rise as compared with 1927 was in the pelagic group, and principally in herrings, which, with a total of 4,156,000 cwts., increased by 20 per cent. Sprats (46,000 cwts.) decreased by 33 per cent. Although the demersal group decreased by 3 per cent., from 9,308,000 cwts. to 9,017,000 cwts., the value increased by 4 per cent., to £11,304,000. Many of the individual kinds showed an increase in quantity, the most notable being saithe (coalfish) which rose by 25 per cent. to 423,000 cwts. Each of the four chief kinds decreased, cod (2,707,000 cwts.) by 8 per cent., haddock (1,945,000 cwts.) by 1 per cent., hake (741,000 cwts.) by 18 per cent., and plaice (596,000 cwts.) by 8 per cent.

The average value per cwt. (on landing) of wet fish as a whole was 19s. 7d. (2d. per lb.)—2d. above the average for 1927 and 9d. below that for 1926. It was, with the exception of 1927, the lowest average since 1914 but was 7s. 2d. above the 1913 level. The average of the demersal group (25s. 1d.), again the second lowest since 1914, was 1s. 9d. higher than in 1927 and 6d. lower than in 1926, while in comparison with 1913 the increase was 7s. 3d. Taking the principal kinds, the averages for cod (19s. 5d.), haddock (21s. 3d.), hake (42s. 9d.), plaice (46s. 2d.), skates and rays (27s.), soles (158s. 5d.) and turbot (94s. 8d.), were higher than in 1927 (by respectively 3s., 11d., 6s. 1d., 1s. 11d., 4d., 4s. 2d., and 2s. 11d.), while the average for halibut (71s. 5d.) was 6s. 1d. lower. Herrings at 8s. 3d., mackerel at 17s. 2d., and pilchards at 7s. 6d. were respectively 1s. 2d., 2s. 3d., and 1s. cheaper.

The value of shell fish landed was £429,000 as against £430,000 in 1927. Most kinds were secured in slightly larger quantities, but oysters decreased by 17 per cent.

The proportion of "bottom fish" (*i.e.*, demersal fish and trawl and Danish seine caught herrings and mackerel) captured by steam trawlers was 91 per cent. as against 90·2 per cent. in 1927, the actual quantity (8,304,000 cwts.) being 2 per cent. less. The catches by sailing trawlers, steam liners, motor liners, and steam seiners were also lighter than in the previous year, but those by motor trawlers and motor seiners were heavier. The average catch per unit of time was less than in 1927 for steam and sailing trawlers and motor liners, and was greater for motor trawlers and seiners and steam liners. In the case of steam trawlers, with an average catch per 100 hours' fishing of 239 cwts. the decrease was 2 per cent. and most of the regions showed smaller yields.

The total quantity of bottom fish landed from the two most important regions, the North Sea and Iceland, did not show any marked change, the former yielding 201,000 cwts. (7 per cent.) less, and the latter 120,000 cwts. (4 per cent.) more. The Greenland fishing showed further development during the year; some 110,000 cwts. were landed, but, for technical reasons, some of this has had to be included under foreign landings. Other variations of note were Barents Sea (decrease of 46,000 cwts., or 36 per cent.), Irish Sea (decrease of 42,000 cwts., or 16 per cent.), and West of Ireland (increase of 51,000 cwts., or 19 per cent.).

The number of first-class fishing vessels on the Register of England and Wales on the 31st December last (2,472) was 92 less than on the 31st December, 1927. Steamers (1,702) were 33 less, motor boats (414) 24 less, and sailing vessels (356) 36 less. Among the steamers, trawlers (1,196) and drifters (326) increased by 5 and 11 respectively, while liners (51) declined by 6, and seiners (65) by 19.

The quantity of fish of all kinds (fresh and preserved) imported into the United Kingdom, 5,453,000 cwts., was the largest on record, exceeding the previous largest quantity, that of 1927, by 13 per cent. The value (£13,554,000) was greater by 17 per cent. Deducting the quantity re-exported, there remained for consumption in the United Kingdom 4,950,000 cwts., valued at £11,844,000, an increase of 12 per cent. in quantity and of 16 per cent. in value as compared with 1927. Both the fresh and the preserved imports showed increases, although the quantity received direct from the fishing grounds, 1,444,000 cwts., was less by 3 per cent. Of the imports retained, fresh or frozen fish (3,400,000 cwts.) increased by 8 per cent., uncanned cured fish (402,000 cwts.) by 9 per cent., and canned (1,148,000 cwts.) by 26 per cent.

Exports of British fish (7,700,000 cwts., valued at £7,544,000) showed an increase as compared with 1927 of 20,000 cwts. in quantity, and of £542,000 in value. Fresh fish (1,413,000 cwts.) which consisted mainly of herrings, showed a decrease of 104,000 cwts.; cured herrings (5,450,000 cwts.) increased by 81,000 cwts.; and canned fish (146,000 cwts.) increased by 17,000 cwts.

I am, Sir,

Your obedient Servant,

HENRY G. MAURICE,

Fisheries Secretary.

SEA FISHERIES.—STATISTICAL TABLES, 1928.

CONTENTS.

NOTE.—Unless otherwise stated all the tables relate to England and Wales (including the Isle of Man) and to fish of British taking.

1927	17,670	12,890	30,556	1,242	2,698	3,940	34,406

The following figures, extracted from the latest available report of the Fishery Board for Scotland, are added for convenience:—

Scotland (1927) : Fishermen totalled 25,677 (24,675 regularly and 1,002 partially employed); 3,169 were engaged in trawling.

Fishing Vessels.					
	Steam.	Motor.	Sailing.	Total.	
1st Class	1,186	727	119	2,032	
2nd and 3rd Class	—	1,200	3,167	4,367	
Total No.	1,186	1,927	3,286	6,399	
Net Tonnage	56,178	24,083	9,459	89,720	

Of the steamers, 319 (net tonnage 24,471) were trawlers, 869 (net tonnage 31,692) were engaged in drifting and lining and 4 (net tonnage 15) in mussel dredging. Of the motor boats, 945 (18,470 tons) were engaged mainly in the herring fishery and 982 (5,613 tons) of which 15 (76 tons) were trawlers, mainly in demersal fishing. Of the sailing vessels, 19 (87 tons) were trawlers.

1925	2,717	164,318	3,899	21,865	1,731	2,755	8,347	188,918
1926	2,626	161,340	3,827	21,432	1,653	2,610	8,106	185,382
1927	2,564	159,583	3,766	20,927	1,511	2,374	7,841	182,884

* Fishing boats are divided into the following classes:—

The First Class includes all steam and motor boats of 15 tons gross tonnage and upwards and all sailing boats of 15 tons net tonnage and upwards.

The Second Class includes all steam and motor boats of less than 15 tons gross tonnage and other vessels of less than 15 tons net tonnage but of 18 feet keel and upwards.

The Third Class includes all boats (other than steam or motor) under 18 feet keel, except those navigated by oars only and marked with the owner's name and the port or place to which they belong.

* Boats using the Danish Seine method were not separately distinguished before 1924.

† The figures for 1928 are subject to revision.

NOTE.—Only vessels returned as fishing solely by trawl, lines, drift nets (including some Danish Seiners previous to 1924) and Danish Seines appear in this Table.

IMPORTS AND EXPORTS.

(The figures for 1928 are advance figures specially supplied by the Board of Customs and Excise).
