Ministry of Agriculture and Fisheries,
Fisheries Department,

43, Parliament Street,

London, S.W.1.

March, 1937.

To the Minister of Agriculture and Fisheries.

Sir,

I have the honour to submit herewith the statistical tables relating to Sea Fisheries for the year 1936.

The total quantity of wet fish of British taking landed in England and Wales during the year was 15,813,000 cwts., valued at £11,931,000, as compared with 14,347,000 cwts., valued at £11,956,000 in 1935—an increase of 10 per cent. in quantity for practically identical value.

The demersal group increased by 11 per cent. to 12,638,000 cwts. The four chief kinds, cod (6,523,000 cwts.), haddock (1,599,000 cwts), hake (465,000 cwts.) and plaice (553,000 cwts.) increased by 17 per cent., 13 per cent., 8 per cent. and 6 per cent. respectively. Halibut decreased by 23 per cent. The pelagic group increased by 8 per cent. to 3,169,000 cwts., herrings (2,858,000 cwts.), being 8 per cent. higher.

The average value per cwt. (on landing) of wet fish as a whole was 15s. 1d. (1·62d. per lb.). This was 1s. 7d. below the average for 1935 and 2s. 6d. below the average for 1934. The average of the demersal group was 16s. 9d. (1·79d. per lb.)—2s. 6d. lower than in 1935 and 3s. 6d. lower than in 1934. Taking the principal kinds, the averages for cod (10s. 11d.), haddock (19s. 2d.), hake (42s. 1d.), plaice (47s. 4d.), skates and rays (26s. 3d.) and whiting (16s. 1d.) were lower by 1s. 7d., 3s. 4d., 6s. 9d., 2s. 3d., 1s. 3d., and 7d. respectively, while soles (120s. 0d.) and turbot (72s. 11d.) were higher by 6d. and 8s. 4d. respectively. Herrings (8s. 6d.) were 2s. 0d. dearer and mackerel (9s. 11d.) were 1s. 8d. cheaper.

The value of shellfish landed was £444,000 as against £403,000 in 1935.

The proportion of "bottom fish" (i.e. demersal fish and pelagic fish secured by demersal catching methods) landed by steam trawlers was 97 per cent. as against 96 per cent. in 1935, the actual quantity, 12,587,000 cwts., being 13 per cent. greater. The quantities landed by sailing trawlers, steam and motor liners, and steam Danish seiners were less than in the previous year, but the landings by motor trawlers and motor Danish seiners were greater. The average quantity landed per unit of time was greater than in 1935 for all the principal types except steam Danish seiners. In the case of steam trawlers, with an average landing per 100 hours fishing of 362 cwts., the increase was 20 per cent.

The total quantity of bottom fish landed from the North Sea (1,760,000 cwts.) showed a decrease of 13 per cent. and the quantity from Iceland (3,419,000 cwts.) a decrease of 6 per cent. Barents Sea (1,502,000 cwts.) increased by 74 per cent., the Norwegian coast (421,000 cwts.) by 72 per cent. and Bear Island (2,117,000 cwts.) by 50 per cent. Landings from Faroe and the South of Ireland showed little change, but West of Scotland (797,000 cwts.) increased by 15 per cent. and West of Ireland (322,000 cwts.) by 34 per cent.

The number of first-class fishing vessels on the Register of England and Wales on 31st December last (2,111) was 48 less than on the 31st December, 1935. Steamers (1,615) numbered 9 less, motor boats (382) 5 less, and sailing boats (114) 34 less.

The quantity of fish of all kinds (fresh and preserved) imported into the United Kingdom totalled 3,621,000 cwts., valued at £9,555,000—a decrease of 7 per cent. in quantity and an increase of 4 per cent. in value, as compared with the previous year. Deducting the quantity re-exported, there remained for consumption in the United Kingdom 3,472,000 cwts., valued at £9,096,000, a decrease of 7 per cent. in quantity and an increase of 4 per cent. in value. The canned imports increased, but the fresh and cured imports, decreased. The quantity received direct from the fishing grounds 474,000 cwts., was 14 per cent. less. Of the imports retained, fresh or frozen fish (1,951,000 cwts.) decreased by 10 per cent. and uncanned cured fish (86,000 cwts.) by 40 per cent., while canned fish (1,435,000 cwts.) increased by 2 per cent.

Exports of British fish (4,553,000 cwts. valued at £3,971,000) showed a decrease of 1 per cent. in quantity and an increase of 6 per cent. in value. Fresh fish (1,373,000 cwts.), which consisted mainly of herrings, increased by 31 per cent., canned fish (78,000 cwts.) decreased by 4 per cent., and cured herrings (2,719,000 cwts.) by 11 per cent.

I am, Sir,

Your obedient Servant,

HENRY G. MAURICE,

Fisheries Secretary.

SEA FISHERIES.—STATISTICAL TABLES, 1936.

CONTENTS.

NOTE.—Unless otherwise stated all the tables relate to England and Wales (including the Isle of Man) and to fish of British taking.

Fish Landed—Year 1936 only.

TABLE.			
1	Quantity, Value and Average Value, each kind, British and Foreign	..	5
2A	At each Station, British	6
2B	" " Foreign (Direct)	18
3	Quantity and No. of Landings of Pelagic Fish by Class of Vessel and Motive Power—Totals and Chief Stations	19
4	No. of Landings, Duration of Voyage, Hours Fishing for Bottom Fish, each Region, each type of 1st-class vessel	20
5A	Regional Distribution of each kind of Wet Fish by Methods of Capture—British	21
5B	Do. Foreign (Direct)	29
10	Quantity, and Average Quantity landed per unit of time, of each kind of Bottom Fish by each type of 1st-class vessel, Sub-Regions of North Sea	35

Fish Landed—Each Year, usually 1926–36.

6 Quantity, and Average Quantity landed per unit of time, of each kind
 of Bottom Fish by each type of 1st-class vessel, each Region, 1935
 and 1936
 7 Quantities and Values, British and Foreign (Direct), 1886-1936 .. .
 8 Quantity of each kind of Demersal Fish
 9 " " " Shell Fish
 11 Average Value of each kind of Wet and Shell Fish, 1928-36 .. .
 12 Quantity of Wet Fish, British and Foreign (Direct), by Methods of Capture
 13 Quantities and Values, British and Foreign (Direct), at certain Stations
 14 Regional Distribution of Demersal Fish
 15 " " " Pelagic Fish
 16 Quantity (and Total Value) of Pelagic Fish by Methods of Capture .. .
 17 Quantity of Principal Kinds, and Total Value, Great Britain .. .

Fishermen and Fishing Vessels.

1935	18,800	9,809	28,609	1,413	1,903	3,316	31,925

The following figures, extracted from the latest available report of the Fishery Board for Scotland, are added for convenience:—

Scotland (1935): *Fishermen* totalled 22,175 (21,295 regularly and 880 partially employed); 3,715 men were engaged in trawling.

	Fishing Vessels.				Total.
	Steam.	Motor.	Sailing.		
1st Class	1,044	930	22		1,996
2nd and 3rd Class	—	1,461	2,200		3,661
Total No.	1,044	2,391	2,222		5,657
Net Tonnage	56,253	24,738	4,291		85,282

Of the steamers, 373 (net tonnage 31,265) were trawlers, 669 (net tonnage 24,981) were engaged in drifting and lining and 2 (net tonnage 7) in mussel dredging. Of the motor boats, 684 (13,574 tons) were engaged mainly in the herring fishery and 1,707 (11,164 tons) of which 23 (104 tons) were trawlers, mainly in demersal fishing. Of the sailing vessels, 15 (42 tons) were trawlers.

* Fishing boats are divided into the following classes:—

The *First Class* includes all steam and motor boats of 15 tons gross tonnage and upwards and all sailing boats of 15 tons net tonnage and upwards.

The *Second Class* includes all steam and motor boats of less than 15 tons gross tonnage and other vessels of less than 15 tons net tonnage but of 18 feet keel and upwards.

The *Third Class* includes all boats (other than steam or motor) under 18 feet keel, except those navigated by oars only and marked with the owner's name and the port or place to which they belong.
