FOREWORD

Total Quantities of British Taking. The total quantity of wet fish of British taking landed in England and Wales during 1951 was 14,001,366 cwt. compared with 12,598,219 cwt. in 1950.

Demersal Landings—British Taking. The demersal group accounted for 12,289,364 cwt. of the 1951 catch as compared with 10,900,275 cwt. in 1950. Of the principal kinds in this group, 1951 landings of cod (6,826,128 cwt.) showed an increase of 20 per cent., while haddock (1,524,053 cwt.), plaice (476,904 cwt.), and hake (399,844 cwt.) decreased by 6 per cent., 15 per cent. and 4 per cent. respectively compared with the 1950 landings.

Pelagic Landings—British Taking. The landings of pelagic fish amounted to 1,708,730 cwt. in 1951, against 1,696,517 cwt. in 1950. These landings consisted mainly of herrings, which accounted for 1,486,025 cwt. in 1951 and 1,528,841 cwt. in 1950.

Landings by First-Class British vessels. The landings by steam trawlers in 1951 were 96 per cent. of the whole catch by deep sea vessels fishing with demersal methods. At 10,964,461 cwt. they were higher than those of 1950 by 13 per cent. The average quantity landed per unit of time by steam trawlers increased from 559 cwt. in 1950 to 604 cwt. per 100 hours fishing in 1951.

The total value of wet fish of British taking rose to £34,475,761 in 1951, compared with the 1950 figure of £26,299,182.

The average value per cwt. of wet fish in 1951 was 49s. 3d. (5.28d. per lb). This was 7s. 6d. above the average for 1950. The 1951 average for the demersal group was 53s. 0d. (5.68d. per lb.) being 7s. 8d. higher than in 1950.

The value of shell fish amounted to £879,768 in 1951 against £720,163 in 1950.

Imports. The quantity of fish in all forms imported into the United Kingdom during 1951 was 3,734,990 cwt. valued at £19,173,508 as compared with 2,745,201 cwt. valued at £15,982,046 in 1950. After deducting the quantity re-exported, there remained for consumption 3,704,306 cwt. valued at £18,789,676 as compared with 2,680,803 cwt. valued at £15,016,374 in 1950.

Of the imports retained in 1951, 3,346,709 cwt., consisted of fresh or frozen fish compared with 2,174,288 cwt. in 1950.

Exports. The total exports of fish of British taking from the United Kingdom decreased in 1951 to 1,270,226 cwt. from 1,362,070 cwt. in 1950. The 1,270,226 cwt. exported in 1951 included 195,325 cwt. of fresh or frozen fish, 595,924 cwt. of cured or salted herrings, and 247,552 cwt. of canned fish. The comparable figures of 1950 were fresh or frozen fish 260,970 cwt., cured or salted herrings 628,653 cwt., and canned fish 233,051 cwt.

EXPLANATORY NOTES

Unless otherwise stated the tables relate to fish of British taking landed in England and Wales.

Landings. The different kinds of fish are divided into three main groups : Demersal, Pelagic and Shell. The name of each kind of fish included under each group is shown in Table I.

Place of Capture. (See tables 4, 5 and 8). The fishing grounds are divided into statistical regions which are given in detail on page 5.

" Distant Waters " include the Barents Sea and waters adjacent to Bear Island, Spitzbergen, Greenland, Iceland, Labrador, Newfoundland, the Norwegian Coast, Skagerak and the Mauretanian Coast.

" Near and Middle Waters " comprise the North Sea, the Irish Sea, the Bristol and English Channels and waters adjacent to the Faroes, Rockall, West of Scotland and West and South of Ireland.

Deep Sea Landings include catches by Steam Trawlers and by all other vessels making voyages of over 72 hours duration.

Inshore Landings include catches by second and third-class vessels, and by first-class vessels, other than Steam Trawlers, which make voyages of not exceeding 72 hours duration.
