FOREWORD

Total quantities of British taking. The total quantity of wet fish of British taking landed in England and Wales during 1957 was 11,432,156 cwt compared with 12,812,084 cwt in 1956.

Demersal landings—British taking. The demersal group accounted for 10,612,838 cwt of the 1957 catch as compared with 11,798,889 cwt in 1956. Of the principal kinds in this group, 1957 landings of plaice (566,615 cwt) increased by 0·1 per cent, but cod (5,888,534 cwt) haddock (1,434,021 cwt) and hake (199,870 cwt) decreased by 16·1 per cent, 2·9 per cent and 12·9 per cent respectively, compared with 1956 landings.

Pelagic landings—British taking. The landings of pelagic fish amounted to 819,318 cwt in 1957 as against 1,013,195 cwt in 1956. These consisted mainly of herrings, which accounted for 684,333 cwt in 1957, compared with 768,605 cwt in 1956.

Landings by vessels 40 feet and over. The landings by steam trawlers in 1957 were 83 per cent of the whole catch by deep-sea vessels fishing with demersal methods. At 8,186,657 cwt they were lower than 1956 by 15·5 per cent. The average quantity landed per unit of time by steam trawlers decreased from 907 cwt in 1956 to 795 cwt per 100 hours' fishing in 1957.

The total value of wet fish of British taking rose to £34,611,874 compared with £34,587,301 in 1956.

The average value per cwt of wet fish in 1957 was 60s. 7d. (6·49d. per lb.). This was 6s. 7d. above the average for 1956. The 1957 average for the demersal group was 63s. (6·75d. per lb.), being 6s. 7d. higher than in 1956.

The value of shellfish amounted to £1,078,523 in 1957, against £1,024,415 in 1956.

Imports. The quantity of fish in all forms imported into the United Kingdom during 1957 was 3,467,570 cwt valued at £33,429,489, as compared with 3,128,957 cwt valued at £31,822,522 in 1956. After deducting the quantity re-exported there remained for consumption 3,455,732 cwt valued at £33,184,126, as compared with 3,119,236 cwt valued at £31,592,378 in 1956.

Of the imports retained in 1957, 2,413,180 cwt consisted of fresh or frozen fish compared with 1,991,153 cwt in 1956.

Exports. The total exports of fish of British taking from the United Kingdom decreased in 1957 to 801,414 cwt from 936,032 cwt in 1956. The 801,414 cwt exported in 1957 included 213,307 cwt of fresh or frozen fish, 303,322 cwt of cured or salted herrings and 111,621 cwt of herrings in airtight containers. The comparable figures for 1956 were fresh or frozen fish 243,487 cwt, cured or salted herrings 350,005 cwt, and herrings in airtight containers 107,576 cwt.

EXPLANATORY NOTES

Unless otherwise stated, the tables relate to fish of British taking landed in England and Wales.

Landings. The different kinds of fish are divided into three main groups : Demersal, Pelagic and Shell. The name of each kind of fish included under each group is shown in Table I.

Place of Capture. (See Tables 4, 5 and 8). The fishing grounds are divided into statistical regions which are given in detail below.

" Distant Waters " include the Barents Sea and waters adjacent to Bear Island, Spitzbergen, Greenland, Iceland, Labrador, Newfoundland, the Norwegian Coast, and the Mauretanian Coast.

" Near and Middle Waters " comprise the North Sea, the Irish Sea, the Bristol and English Channels, and waters adjacent to the Faroes, Rockall, West of Scotland, and west and south of Ireland.

Deep Sea Landings include catches by all vessels making voyages of over 72 hours duration.

Vessels 40 ft and over registered length. As from 1st January, 1955, the division of classes of fishing vessels is based on registered length. Those classified as 40 ft and over in these tables are the vessels formerly described as first-class vessels of 15 gross tons and over.

Inshore Landings include catches by vessels under 40 ft registered length, and by vessels 40 ft and over registered length which make voyages of not exceeding 72 hours duration.

Fishermen and Fishing Vessels. Up to 1951 this information was supplied by the Registrar-General of Shipping and Seamen from details entered in the Register. As from 1952, particulars have been collected at the ports by the District Fishery Officers of the Ministry of Agriculture, Fisheries and Food, and Tables 12, 13 and 14 show the number of vessels and fishermen working during the year. For comparison, Tables 12 and 13 include details obtained by the Ministry by census in 1924, 1928 and 1936.

1954	515	144	454	—	3,403	182
1955	396	164	488	—	3,323	162
1956	287	174	529	—	3,384	151
1957	229	187	588	—	3,679	150

Figures in the above Tables were supplied by the District Fishery Officers of the Ministry of Agriculture, Fisheries and Food. Entries in the corresponding tables published in the Sea Fisheries Statistical Tables prior to 1952 were compiled from information supplied by the Registrar-General of Shipping and Seamen.

The following figures furnished by the Fisheries Division of the Scottish Home Department are added for convenience:

Scotland (1957): Fishermen totalled 11,623 (10,472 regularly, and 1,151 partially employed).
