## FOREWORD

**Total Quantities of British Taking.** The total quantity of wet fish of British taking landed in England and Wales during 1958 was 11,296,064 cwt compared with 11,432,156 cwt in 1957.

**Demersal Landings—British Taking.** The demersal group accounted for 10,633,224 cwt of the 1958 catch as compared with 10,612,838 cwt in 1957. Of the principal kinds in this group, 1958 landings of cod (5,895,198 cwt) and plaice (595,690 cwt) increased by 0·1 per cent and 5·1 per cent respectively, but haddock (1,257,482 cwt) and hake (186,013 cwt) decreased by 12·3 per cent and 6·9 per cent respectively, compared with 1957 landings.

**Pelagic Landings—British Taking.** The landings of pelagic fish amounted to 662,840 cwt in 1958 as against 819,318 cwt in 1957. These consisted mainly of herrings which accounted for 509,035 cwt in 1958, compared with 684,333 cwt in 1957.

**Landings by Vessels 40 feet and over.** The landings by steam trawlers in 1958 were 77·3 per cent of the whole catch by deep-sea vessels fishing with demersal methods; at 7,824,493 cwt they were lower than 1957 by 4·4 per cent. The average quantity landed per unit of time by steam trawlers decreased from 795 in 1957 to 779 per 100 hours' fishing in 1958.

The total value of wet fish of British taking rose to £36,197,903, compared with £34,611,874 in 1957.

The average value per cwt of wet fish in 1958 was 64s. 1d. (6·87d. per lb.). This was 3s. 6d. above the average for 1957. The 1958 average for the demersal group was 65s. 11d. (7·06d. per lb.), being 2s. 11d. higher than in 1957.

The value of shellfish amounted to £1,069,288 in 1958, against £1,078,523 in 1957.

**Imports.** The quantity of fish in all forms imported into the United Kingdom during 1958 was 3,672,086 cwt valued at £48,412,101, as compared with 3,465,938 cwt valued at £33,403,934 in 1957. After deducting the quantity re-exported there remained for consumption 3,660,065 cwt valued at £48,156,947, as compared with 3,454,103 cwt valued at £33,158,926 in 1957.

Of the imports retained in 1958, 2,165,587 cwt consisted of fresh or frozen fish compared with 2,411,428 cwt in 1957.

**Exports.** The total exports of fish of British taking from the United Kingdom increased in 1958 to 872,901 cwt from 801,610 cwt in 1957. The 872,901 cwt exported in 1958 included 342,464 cwt of fresh or frozen fish, 298,655 cwt of cured or salted herrings and 76,363 cwt of herrings in airtight containers. The comparable figures for 1957 were fresh or frozen fish 213,246 cwt, cured or salted herrings 303,341 cwt, and herrings in airtight containers 111,711 cwt.

16. Exports (British) by Kinds and Countries . . . . .	30, 31
17. Summary . . . . .	32

## EXPLANATORY NOTES

Unless otherwise stated, the tables relate to fish of British taking landed in England and Wales.

**Landings.** The different kinds of fish are divided into three main groups : Demersal, Pelagic and Shell. The name of each kind of fish included under each group is shown in Table I.

**Place of Capture.** (See Tables 4, 5 and 8). The fishing grounds are divided into statistical regions which are given in detail below.

" Distant Waters " include the Barents Sea and waters adjacent to Bear Island, Spitzbergen, Greenland, Iceland, Labrador, Newfoundland, the Norwegian Coast, and the Mauretania Coast.

" Near and Middle Waters " comprise the North Sea, the Irish Sea, the Bristol and English Channels, and waters adjacent to the Faroes, Rockall, West of Scotland, and west and south of Ireland.

**Deep Sea Landings** include catches by all vessels making voyages of over 72 hours' duration.

**Vessels 40 ft and over registered length.** As from 1st January, 1955, the division of classes of fishing vessels is based on registered length. Those classified as 40 ft and over in these tables are the vessels formerly described as first-class vessels of 15 gross tons and over.

**Inshore Landings** include catches by vessels under 40 ft registered length, and by vessels 40 ft and over registered length which make voyages of not exceeding 72 hours' duration.

**Fishermen and Fishing Vessels.** Up to 1951 this information was supplied by the Registrar-General of Shipping and Seamen from details entered in the Register. As from 1952, particulars have been collected at the ports by the District Fishery Officers of the Ministry of Agriculture, Fisheries and Food, and Tables 12, 13 and 14 show the number of vessels and fishermen working during the year. For comparison, Tables 12 and 13 include details obtained by the Ministry by census in 1924, 1928 and 1936.

1956	287	174	529	—	3,384	151
1957	229	187	588	—	3,679	150
1958	197	191	635	—	3,628	177

Figures in the above Tables were supplied by the District Fishery Officers of the Ministry of Agriculture, Fisheries and Food. Entries in the corresponding tables published in the Sea Fisheries Statistical Tables prior to 1952 were compiled from information supplied by the Registrar-General of Shipping and Seamen.

The following figures furnished by the Fisheries Division of the Scottish Home Department are added for convenience:

Scotland (1958): Fishermen totalled 10,098 (8,837 regularly, and 1,261 partially employed).

Note: The figures include the Value of "Oysters for Breeding" but not the Quantity.

\* Includes "Wet Salted Split"

MINISTRY OF  
AGRICULTURE, FISHERIES AND FOOD

A SELECTION OF  
FISHERY INVESTIGATIONS

SERIES II VOLUME XX

- No. 3 Environmental Factors Governing the Infection of Mussels, *Mytilus edulis* by *Mytilicola intestinalis* (1956) 3s. (post 4d.)  
No. 4 Phytoplankton and the Herring (1956) 4s. (post 4d.)  
No. 5 On the Fishing Effort in English Demersal Fisheries (1956) 7s. 6d. (post 5d.)  
No. 6 Biology and Distribution of the Slipper Limpet *Crepidula fornicata* in Essex Rivers, with Notes on the Distribution of the larger Epi-Benthic Invertebrates (1956) 10s. (post 5d.)  
No. 7 The Great Spatfall of Mussels (*Mytilus edulis* L.) in the River Conway Estuary in Spring, 1940 (1956) 5s. (post 4d.)  
No. 8 Simplified System of Mussel Purification (1956) 5s. (post 4d.)  
No. 9 Experimental Rearing of the Larvae of the *Ostrea edulis* L. in the Laboratory (1956) 6s. (post 4d.)  
No. 10 Benthic Animals as Indicators of Hydrographic Conditions and Climatic Change in Svalbard Waters (1957) 22s. 6d. (post 6d.)  
No. 11 On the Herring of the Southern North Sea (1957) 8s. 6d. (post 4d.)

SERIES II VOLUME XXI

- No. 1 Oyster Production in the Rivers Crouch and Roach, 1950-1954 (1957) 10s. 6d. (post 4d.)  
No. 2 The 1951 Oyster Stock in the Rivers Crouch and Roach, Essex (1957) 8s. 6d. (post 4d.)  
No. 3 The Interpretation of Echo Traces (1957) 6s. (post 4d.)  
No. 4 The Biology of *Pandalus montagui* Leach (1957) 14s. (post 5d.)  
No. 5 The Number of Pilchards in the Channel (1957) 6s. (post 4d.)  
No. 6 The Bear Island Cod Migrations and Movements (1958) 16s. (post 5d.)  
No. 7 The Laverbread Industry in South Wales and the Laverweed (1958) 4s. (post 2d.)  
No. 8 Account of the Fishing Gear of England and Wales (1959) 35s. (post 1s.)
