FOREWORD

The Sea Fisheries Statistics for 1980 largely follow the layout of the 1979 publication. Where appropriate, figures for earlier years have been converted to metric units. Classification of vessel lengths and gross registered tonnage of vessels remain in imperial units. The tables refer, as far as possible, to the United Kingdom with separate figures for England and Wales, Scotland and Northern Ireland. Additional statistics relating to Scotland are published annually in the Scottish Sea Fisheries Statistical Tables.

In some cases figures for the various parts of the United Kingdom are not strictly comparable and differences are explained in the headings and footnotes of the tables. More general definitions are given in the Explanatory Notes on Page 1.

These tables are intended to provide a broad picture of the United Kingdom fishing industry and its operations. Requests for more detailed information should be addressed to:

CONTENTS

Unless otherwise stated all tables relate to the United Kingdom with, where available, separate figures for England and Wales, Scotland and Northern Ireland.

EXPLANATORY NOTES

1. The various species of fish are divided into three main groups: demersal, pelagic and shellfish. The names of the kinds of fish included in each group are shown in table 2.
2. The term "demersal" fish covers species living on or near the sea bed; "pelagic" fish are species found mainly in coastal waters in shoals near the surface of the sea. The term "wet fish" is used to denote both demersal and pelagic species.
3. Quantities of headless or filleted-at-sea fish landed by British and foreign fishing vessels are shown in terms of equivalent landed weight (i.e. head on, gutted) except in the trade tables (17 et seq) where actual product weights are shown.
4. The figures of "fish livers" are expressed as the raw equivalent of any liver oils landed.
5. The average values of fish quoted in table 11 are those realised at first-hand sales and apply to all fish sold regardless of whether it was sold for human consumption or for other uses (e.g. fish meal, animal feeding stuffs).
6. The term "British landings" relates to the landings of British registered fishing vessels.
7. Mackerel landing figures for 1977 - 1980 include a quantity caught by British vessels but not actually landed at British ports. These quantities are transhipped to foreign vessels in coastal waters and are later recorded as exports.
8. The sign ● indicates a quantity of less than 0.5 tonne or a value less than £500 according to the table.

(a) Salmon and trout are excluded.

The quantity of boneless fish is expressed in terms of landed weight equivalent (head on, gutted). The actual weight of imported boneless fish is shown in tables 17 and 18. Imports include semi-preserved (salted, in brine, dried or smoked) fish.

(b) Pelagic fish, other than herring, are not separately distinguishable in the import statistics. These imports are relatively small and are included with demersal fish.

(a) The weight of oysters is calculated on the basis of one tonne being equal to 15,748 oysters in England and Wales.

(b) Includes transhipments of mackerel (see explanatory note 7, page 1).

* Includes landings by foreign fishing vessels and carriers (if first point of sale of fish). Total imports, which combine landings by fishing vessels, carriers and cargo vessels are shown in tables 17 and 18.

Notes (i) These statistics are based on total supplies moving into consumption and not final consumption since it is not practicable to measure changes in wholesale and retail stock levels.

(ii) The figures include consumption not only in private households but also in institutions and catering establishments, and by H.M. Forces in the United Kingdom. Comprehensive tables of food consumption levels in the United Kingdom are published annually in the Trade and Industry Journal and in the Annual Abstract of Statistics.

(iii) More detailed estimates of the consumption of fish and other foods in private households are published in the annual reports of the National Food Survey Committee.

N.B.—The series for 'Fresh, frozen and cured' fish has been revised as from 1960 and broken down into 'Herring' and 'Other'; it is not strictly comparable with the series for earlier years.

(b) Prior to 1961 Scottish figures were as at 30th November of each year.

(c) From 1966 these figures exclude 'hobby' fishermen, i.e. fishermen who do not fish commercially. The corresponding figures for Scotland and Northern Ireland have never included 'hobby' fishermen.
