Canadian Data Report of Fisheries and Aquatic Sciences

These reports provide a medium for filing and archiving data compilations where little or no analysis is included. Such compilations commonly will have been prepared in support of other journal publications or reports. The subject matter of Data Reports reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries management, technology and development, ocean sciences, and aquatic environments relevant to Canada.

Numbers 1-25 in this series were issued as Fisheries and Marine Service Data Records. Numbers 26-160 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Data Reports. The current series name was changed with report number 161.

Data Reports are not intended for general distribution and the contents must not be referred to in other publications without prior written clearance from the issuing establishment. The correct citation appears above the abstract of each report.

Rapport statistique canadien des sciences halieutiques et aquatiques

Ces rapports servent de base à la compilation des données de classement et d'archives pour lesquelles il y a peu ou point d'analyse. Cette compilation aura d'ordinaire été préparée pour appuyer d'autres publications ou rapports. Les sujets des Rapports statistiques reflètent la vaste gamme des intérêts et politiques du Ministère des Pêches et des Océans, notamment gestion des pêches, techniques et développement, sciences océaniques et environnements aquatiques, au Canada.

Les numéros 1 à 25 de cette série ont été publiés à titre de Records statistiques, Service des pêches et de la mer. Les numéros 26-160 ont été publiés à titre de Rapports statistiques du Service des pêches et de la mer, Ministère des Pêches et de l'Environnement. Le nom de la série a été modifié à partir du numéro 161.

Les Rapports statistiques ne sont pas préparés pour une vaste distribution et leur contenu ne doit pas être mentionné dans une publication sans autorisation écrite préalable de l'établissement auteur. Le titre exact paraît au haut du résumé de chaque rapport.

ABSTRACT

Akenhead, S. A., and E. M. LeGrow. 1981. The vertebrates code of the Northwest Atlantic Fisheries Centre. Can. Data Rep. Fish. Aquat. Sci. 309: iv + 58 p.

Approximately 500 species of fish recorded by the Northwest Atlantic Fisheries Centre are assigned to higher taxa and given a unique, ordered, three digit numeric code. A checklist for the Newfoundland-Labrador region is indicated. The marine mammals of the Northwest Atlantic are included as a separate section.

Key words: fishes, Newfoundland, Labrador, species code

RÉSUMÉ

Akenhead, S. A., and E. M. LeGrow. 1981. The vertebrates code of the Northwest Atlantic Fisheries Centre. Can. Data Rep. Fish. Aquat. Sci. 309: iv + 58 p.

Environ 500 espèces de poissons, enregistrées au Centre de Pêches de l'Atlantique Nord-Ouest, sont assignés au plus haut niveau taxonomique, et sont repertoriées sous forme d'un code digital ternaire. Une liste de vérification des espèces de la région de Terre Neuve-Labrador est indiquée. Les mammifères marins de l'Atlantique du Nord-Ouest sont inclus dans une section séparée.

INTRODUCTION

This publication presents a revision of the Northwest Atlantic Fisheries Centre (NAFC) numeric code for fishes. The new code was instituted January 1, 1981. It is arranged as five appendices: by taxonomic order, alphabetically by scientific and common names, alphabetically by family and higher taxa, and a convenience list of commonly used species. Appendix 6 lists and codes the marine mammals of the area.

FISHES

Every species identified from trips on the vessels of the NAFC (formerly St. John's Biological Station, Fisheries Research Board of Canada) is included. A great fraction are recorded only south of Cabot Strait, perhaps 40%. Of the remainder, many are single observations. Many species from as far south as Bermuda (e.g. Mercer 1970) are included. Since every fish species that this Station can confirm as having been identified from the Grand Bank and Labrador Shelf, and from the fresh waters of Newfoundland and Labrador is indicated by an asterisk in Appendix 1, the function of a checklist is fulfilled.

The code is numeric, three digits, from 010 to 999. There are 674 assigned entries, leaving 318 unassigned codes which are scattered throughout. Groups of unassigned codes are left where new families and genera are anticipated, and provision for more members of most genera has been possible. However, the code is quite crowded and will eventually require applying one of the following possible changes: a) using a fourth digit, b) including new symbols beyond 0-9, or c) deleting species found exclusively south of the Laurentian Channel. Nonetheless, it is expected to be usable for the next decade and possibly longer.

The taxonomy includes class, order, family, genus, and species. Suborders and superfamilies are omitted except for the suborders of the extensive Perciformes (eg. Blennioidea). Subspecies, when they are recognized, have not been assigned separate codes, since usually only one form occurs in this area. Hybrids, such as the 'tiger-trout' (Salmo trutta x Salvelinus fontinalis) and the 'splake' (Salvelinus fontinalis x Salvelinus namaycush) are not considered.

Many of the entries originate with the previous fishes code of this laboratory (Templeman 1966). The only section of that earlier code that has been changed significantly in taxonomy is the Myctophiformes or lanternfish, which now conform to Nafpaktitis et al. (1977). Many previously used Good and Bean (1895) names in this family are now considered synonyms. The Myctophiformes are poorly described and revision is imminent (R. Haedrich, Memorial University of Nfld., pers. comm.). To conform to the recent revision of genus Liparis (Liparidae, Scorpaeniformes) of Able and McAllister (1980), Liparis koefoedi is reassigned as L. fabricii, and L. cyclostigmata is reassigned as L. gibbus.

Two species which have not been recovered from the area in question but are expected to be present are included. These are Phocaegadus megalops (Jensen 1948) and Lycodes nigricans (Jensen 1952).

A correspondence between this new coding and taxonomy and the previously-used code has been produced, and is available upon request.

Ordering such a diverse assembly is subject to contradictory taxonomic schemes. Jordan (1963) was used to identify the family and check genera; however, Lindberg (1973) was used for the higher taxa. Thus the higher taxonomic scheme bears little resemblance to that chosen by Liem and Scott (1966) which is based upon Jordan et al. (1930), but in general the order of species in this code is quite similar to that popular work. Common synonyms have been included in parentheses to make applications of this list easier.

Important differences in taxonomy between Jordan et al. (1930) and Lindberg (1973) include the following:

- Lindberg (1973) groups : Thunnidae in Scombridae
 - Jugulares in Perciformes
 - Icelidae in Cottidae
 - Aspidophoronidae in Agonidae
- Liparidae, Macrouridae and Scorpaenidae are given Order status by Lindberg (1973) but not by Jordan et al. (1930) or Liem and Scott (1966).

The spellings of scientific names are often variable from author to author. We used Liem and Scott (1966), Wheeler (1969) and especially Nelson (1976) to try to find a consensus for particular spellings between recent authors.

Common names were assigned from Robins et al. (1980) whenever possible. Since practical survey work usually results in fish catches being sorted with reference to common names, the appropriate choices can prevent errors in casual work. When no common name exists, one was derived from the genus name or the common name for the family was used with the abbreviation NCN in brackets.

MARINE MAMMALS

Sixty-five entries for 45 species of marine mammals potentially found in the Northwest Atlantic have been assigned codes between 1000 and 1100. Classification follows Leatherwood et al. (1976) and Mansfield (1967). Family Otariidae, the eared seals of order Pinnipedia, have been omitted from the code; they are not inhabitants of the Northwest Atlantic.

ACKNOWLEDGMENTS

Dr W. Templeman assisted in tracking down several rare species from old lists. Mr L. Coady's editorial assistance is appreciated. This work was done at the request of the NAFC Scientific Records Working Group.

APPENDIX 5: COMMON FISHES

APPENDIX 5: COMMON FISHES

SHARKS AND SKATES

024	Dogfish, spiny	<i>Squalus acanthias</i>
027	Dogfish, black	<i>Centroscyllium fabricii</i>
048	Shark, basking	<i>Cetorhinus maximus</i>
051	Porbeagle	<i>Lamna nasus</i>
065	Shark, blue	<i>Prionace glauca</i>
090	Skate, thorny	<i>Raja radiata</i>
091	Skate, smooth	<i>Raja senta</i>
094	Skate, deepwater (round)	<i>Raja fyllae</i>
102	Skate, spinytail	<i>Raja (Bathyraja) spinicauda</i>

PELAGICS AND BATHYPELAGICS

150	Herring, Atlantic	<i>Clupea harengus</i>
167	Herring, black	<i>Bathytroctes</i> sp.
173	Salmon, Atlantic	<i>Salmo salar</i>
187	Capelin	<i>Mallotus villosus</i>
193	Argentine, Atlantic	<i>Argentina silus</i>
227	Viperfish	<i>Chauliodus sloani</i>
272	Lanternfishes	<i>Myctophidae</i>
359	Snubnose eel	<i>Simenchelys parasiticus</i>
368	Snipe eel, Atlantic	<i>Nemichthys scolopaceus</i>
369	Snipe eel, shortnose	<i>Serrivomer beani</i>
373	Longnose eel	<i>Synaphobranchus kaupi</i>
386	Tapirfish, large scale (spiny eel)	<i>Notacanthus nasus</i>
398	Billfish	<i>Scomberesox saurus</i>
572	Mackerel, Atlantic	<i>Scomber scombrus</i>
694	Sand lance, offshore	<i>Ammodytes dubius</i>

COD-LIKE FISHES

432	Hake, blue	<i>Antimora rostrata</i>
438	Cod, Atlantic	<i>Gadus morhua</i>
439	Cod, Greenland (rock)	<i>Gadus ogac</i>
441	Haddock	<i>Melanogrammus aeglefinus</i>
443	Pollock	<i>Pollachius virens</i>
447	Hake, white (common)	<i>Urophycis tenuis</i>
449	Hake, silver	<i>Merluccius bilinearis</i>
451	Cod, Arctic	<i>Boreogadus saida</i>
454	Threebeard rockling	<i>Gaidropsarus ensis</i>
458	Cusk	<i>Brosme brosme</i>
461	Fourbeard rockling	<i>Enchelyopus cimbrius</i>

GRENADIERS

471	Grenadiers	Macrouridae
474	Grenadier, roughhead	Macrourus berglax
478	Grenadier, marlin spike (common)	Nezumia bairdi
481	Grenadier, roundnose	Coryphaenoides rupestris
483	Grenadier, roughnose	Trachyrhynchus murrayi

WOLFFISHES AND EELPOUTS

699	Wolffish, broadhead	Anarhichas denticulatus
700	Wolffish, striped	Anarhichas lupus
701	Wolffish, spotted	Anarhichas minor
712	Shanny, radiated	Ulvaria subbifurcata
725	Eelpouts	Zoarcidae
727	Eelpout, Esmark's	Lycodes esmarki
728	Eelpout, Laval's	Lycodes lavalaei
729	Eelpout, Arctic	Lycodes reticulatus
730	Eelpout, Vahl's	Lycodes vahlii
744	Eelpout, common	Macrozoarces americanus
747	Wolfeels	Lycenchelys sp.
750	Wolfeel, northern (common)	Lycenchelys paxillus
752	Wolfeel, Verrill's	Lycenchelys verilli

REDFISH, SCULPINS, ETC.

792	Redfish	Sebastes sp.
793	Redfish, golden (marinus)	Sebastes marinus
794	Redfish, deep water	Sebastes mentella
809	Sea raven	Hemitripterus americanus
810	Hookear sculpins	Artediellus sp.
813	Mailed sculpins	Triglops sp.
814	Sculpin, moustache (mailed)	Triglops murrayi
819	Sculpin, shorthorn	Myoxocephalus scorpius
820	Sculpin, longhorn	Myoxocephalus octodecemspinosus
827	Deepsea sculpins	Cottunculus sp.
828	Deepsea sculpin, pallid	Cottunculus thompsoni
829	Deepsea sculpin, arctic	Cottunculus microps
836	Alligatorfish, northern	Agonus decagonus
838	Alligatorfish, common	Aspidophoroides monopterygius
844	Lumpfish, spiny	Eumicrotremus spinosus
849	Lumpfish, common	Cyclopterus lumpus
854	Seasnails,	Liparidae
860	Seasnail, striped	Liparis liparis
966	Angler, common (monkfish)	Lophius americanus
980	Sea devils (deep sea anglers)	Ceratiidae

FLATFISH

889	American plaice	Hippoglossoides platessoides
890	Witch flounder	Glyptocephalus cynoglossus
891	Yellowtail flounder	Limanda ferruginea
892	Greenland halibut	Reinhardtius hippoglossoides
893	Halibut, Atlantic	Hippoglossus hippoglossus

UNKNOWN

999 Unidentified fish

APPENDIX 6: MARINE MAMMALS

APPENDIX 6: MARINE MAMMALS

(NS) means 'not specific', i.e. genus or above

(NCN) means 'no common name'

1000	Marine Mammals	
1010	Whales	Cetacea (order)
1011	Baleen whales	Mysticeti (suborder)
1012	Rorqual whales	Balaenopteridae
1013	Rorqual whale (NS)	Balaenoptera sp.
1014	Minke whale	Balaenoptera acutorostrata
1015	Fin whale	Balaenoptera physalus
1016	Blue whale	Balaenoptera musculus
1017	Sei whale	Balaenoptera borealis
1018	Bryde's whale	Balaenoptera edeni
1020	Humpback whale	Megaptera novaeangliae
1022	Right whale	Balaenidae
1023	Bowhead whale	Balaena mysticetus
1024	Right whale	Eubalaena glacialis
1030	Toothed whales	Odontoceti (suborder)
1031	Beaked whale	Ziphiidae
1032	Beaked whale (NS)	Mesoplodon sp.
1033	North Sea beaked whale	Mesoplodon bidens
1034	Dense-beaked whale	Mesoplodon densirostris
1035	Antillean beaked whale	Mesoplodon europaeus
1036	True's beaked whale	Mesoplodon mirus
1038	Goosebeaked whale	Ziphius cavirostris
1039	Northern bottlenosed whale	Hyperoodon ampullatus
1040	Sperm whales	Physeteridae
1041	Pygmy sperm whale (NS)	Kogia sp.
1042	Pygmy sperm whale	Kogia breviceps
1043	Dwarf sperm whale	Kogia simus
1045	Sperm whale	Phyceter catodon
1050	Belugas	Monodon tidae
1051	Narwhal	Monodon monoceros
1052	Beluga	Delphinapterus leucas
1053	(NCN)	Stenidae
1054	Rough-toothed dolphin	Steno bredanensis
1055	Guiana dolphin	Sotalia guianensis
1056	Dolphins, Killer whales	Delphinidae
1057	Dolphin (NS)	Lagenorhynchus sp.
1058	White-beaked dolphin	Lagenorhynchus albirostris
1059	Atl. white-sided dolphin	Lagenorhynchus acutus
1060	Dolphin (NS)	Stenella sp.
1061	Spinner dolphin	Stenella longirostris
1062	Bridled dolphin	Stenella frontalis
1063	Striped dolphin	Stenella coeruleoalba
1064	Spotted dolphin	Stenella plagiodon
1066	Fraser's dolphin	Lagenodelphis hosei
1067	Bottlenosed dolphin	Tursiops truncatus
1068	Grampus	Grampus griseus
1069	Saddlebacked dolphin	Delphinus delphis
1070	Pilot whale (NS)	Globicephala sp.
1071	Atlantic pilot whale	Globicephala melaena
1072	Short-finned pilot whale	Globicephala macrorhynchus

1073	Many-toothed blackfish	<i>Peponocephala electra</i>
1074	Pygmy killer whale	<i>Feresa attenuata</i>
1075	False killer whale	<i>Pseudorca crassidens</i>
1076	Killer whale	<i>Orcinus orca</i>
1077	Porpoises	Phocoenidae
1078	Harbour porpoise	<i>Phocoena phocoena</i>
1080	Seals	Pinnipedia (order)
1081	True seals	Phocidae
1082	Seal (NS)	<i>Phoca</i> sp.
1083	Harbour seal	<i>Phoca vitulina</i>
1084	Ringed seal	<i>Pusa hispida</i>
1085	Harp seal	<i>Phoca groenlandica</i>
1087	Bearded seal	<i>Erignathus barbatus</i>
1088	Grey seal	<i>Halichoerus grypus</i>
1089	Hooded seal	<i>Cystophora cristata</i>
1090	Walruses	Odobenidae
1091	Walrus	<i>Odobenus rosmarus</i>
1099	Polar bear	<i>Thalarctos maritimus</i>
