## **TERMS OF REFERENCE**

The terms of reference for the 1995 Working Group on North Atlantic Salmon (C.Res. 1995/2:13:12) state that the Group should:

“With respect to Atlantic salmon in the NASCO area, provide a compilation of microtag, finclip and external tag releases by ICES Member Countries in 1995”

Data were provided by Working Group members for national tagging programmes, as far as possible

including all agencies and organizations. These compilations are presented by country, together with a summary of the tags and finclips by all countries (Table 1). Data were supplied in the standard format agreed by the Working Group in 1989. A list of national tag clearing houses is also given (Appendix 1).

New information was made available to ICES regarding Table 1 in the 1994 report. Thus this table has been revised and is enclosed as an Errata sheet to this year's report.
