Index of ICES Plankton Identification Leaflets

The first of this series of plankton identification sheets was published by ICES in 1939. The title for most of the sheets until 1986 was *Fiches d'Identification du Zooplancton*. From 1964 to 1972 some contributions on fish eggs and larvae were published under the title *Fiches d'Identification des Oeufs et Larves de Poissons*, but subsequently the contributions on fish have been published

as part of the main series. From 1986 the title was changed to *ICES Identification Leaflets for Plankton*, and the first contributions on phytoplankton were published in 1992. This is an index of all the leaflets published between 1939 and 2000, comprising numbers 1–186 in the main series and numbers 1–6 of *Fiches d'Identification des Oeufs et Larves de Poissons*. They are listed first in numerical order and then in a taxonomic order. Under Comments, an asterisk (*) indicates that the original leaflet is out of print.
