

Press Release: Register for the online ASSEMBLE Plus Conference

ASSEMBLE Plus is proud to announce that its first conference will take place online between the 16th and 27th November 2020.

“**ASSEMBLE 2020 - Marine biological research at the frontier**” will showcase recent developments in marine biology and ecology; state-of-the-art technologies available at marine stations and institutes; how to access biological resources and marine research infrastructure; how to improve services provided by marine stations; and, the impact of the services provided on industry and society. In addition, it will provide an opportunity to celebrate the project’s research on genomic observatories, cryobanking marine organisms, functional genomics, instrumentation, and scientific diving.

ASSEMBLE 2020 will feature lectures, debates, technology demonstrations and round tables. Participation is open to all marine stakeholders. Please [download](#) the conference’s save-the-date flyer and share with your networks.

More information about the conference will be made available soon on www.assembleplus.eu. To stay up-to-date with the latest information, please register your interest by contacting ASSEMBLE Plus’ Communications Officer, Georgia Bayliss-Brown (georgia@aquatt.ie).

You can also follow updates for this project on Twitter at [@ASSEMBLE_Plus](https://twitter.com/ASSEMBLE_Plus).

ASSEMBLE 2020: Online Conference
Marine biological research at the frontier

You are invited to the “*ASSEMBLE 2020 Online Conference - Marine biological research at the frontier*”, brought to you by the Association of European Marine Biological Laboratories Expanded (ASSEMBLE Plus) project and the European Marine Biological Resource Centre (EMBRC).

The conference will showcase recent developments in marine biology and ecology, the advanced technologies available of marine stations and institutes; how to access biological resources and marine research infrastructure; how to improve services provided by marine stations; and, increase the impact from these services on industry and society.

The invitation is open to all stakeholders including existing and potential users of marine stations and their data. We welcome researchers and companies interested in the Blue Growth sectors including biotech, aquaculture, and bioprospecting, to join us and discover what Europe’s marine stations can offer.

16TH - 27TH NOVEMBER 2020

More information will be made available on www.assembleplus.eu

Notes for Editors

This project has received funding from the European Union’s Horizon 2020 Research and Innovation programme under Grant Agreement no. 730984 (ASSEMBLE Plus). The project began in October 2017 and will run until September 2021. The project is coordinated by Sorbonne Université.
