

NETWORK of KNOWLEDGE FOR EUROPE A PROTOTYPE for KNOWLEDGE SYNTHESIS

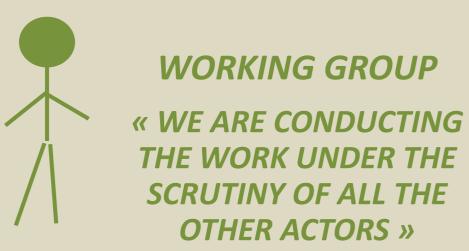

The Network of Knowledge (NoK) is a European initiative to organise and facilitate the exchange and synthesis of knowledge scattered accross many countries, institutions and individual experts, in order to answer questions related to challenges posed by biodiversity and ecosystem services.

FEATURING SPECIAL ACTORS:

REQUESTER

« I NEED KNOWLEDGE TO MAKE THE BEST **POSSIBLE DECISIONS** »

EVALUATORS « WE ASSESS THE

QUALITY OF THE WORK, ITS OBJECTIVITY, **COMPLIANCE TO** STANDARDS, CLARITY

FOR THE REQUESTER »

Manpower

Learned societies as HUBs Research **Projects** institutions as HUBs as HUBs

The Network of Knowledge

We are knowledge providers and holders

We often belong to various hubs and networks

We are concerned by challenges linked to biodiversity and ecosystem services

NoK COORDINATING BODY

« WE LIAISE BETWEEN THE ACTORS, **ENSURE THE LOGISTICS AND COMPLIANCE TO RIGHTS, RULES AND ROLES** »

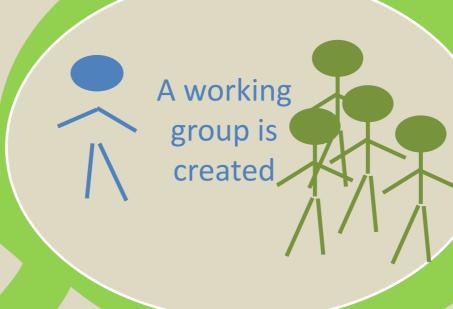

A PROTOTYPE:

We ask the NoK to tell us what knowledge is available

ASK YOUR QUESTION to the NoK

transparency

We submit a draft answer/report for review

We peer-review the report to ensure that it complies to the initial proposal, it provides clear & relevant answers based on sound analysis/

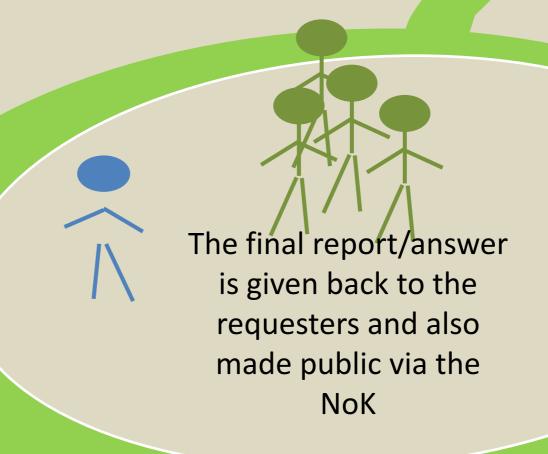

The prototype is currently tested for 3 requests related to

- 1: Conservation of biodiversity
- 2: Marine resources
- 3: Agriculture

using 3 appraoches (methodologies) to synthesize knowledge

- A/ Expert Consultation
- B/ Evidence-based Framework (Systematic reviews)
- C: Adaptive management

Your expertise is needed!
