**TITLE**

**How to manage malfunctioning coastal protection measures and obsolete structures**

# COASTAL ACTION PLANS

## Theme 8

### Sustainable coastal engineering techniques

TITLE	How to manage malfunctioning coastal protection measures and obsolete structures
WHY	What should be done with obsolete or malfunctioning protection measures structures.
WHAT	Define a more or less global approach and guidelines for management of these protection measures, and develop prediction tools for the moment of failure.
HOW	Define a framework for comparing different options to solve the problem.

# COASTAL ACTION PLANS

## Theme 8

### Sustainable coastal engineering techniques

TITLE

Coastal interventions and Natura 2000 areas

# COASTAL ACTION PLANS

## Theme 8

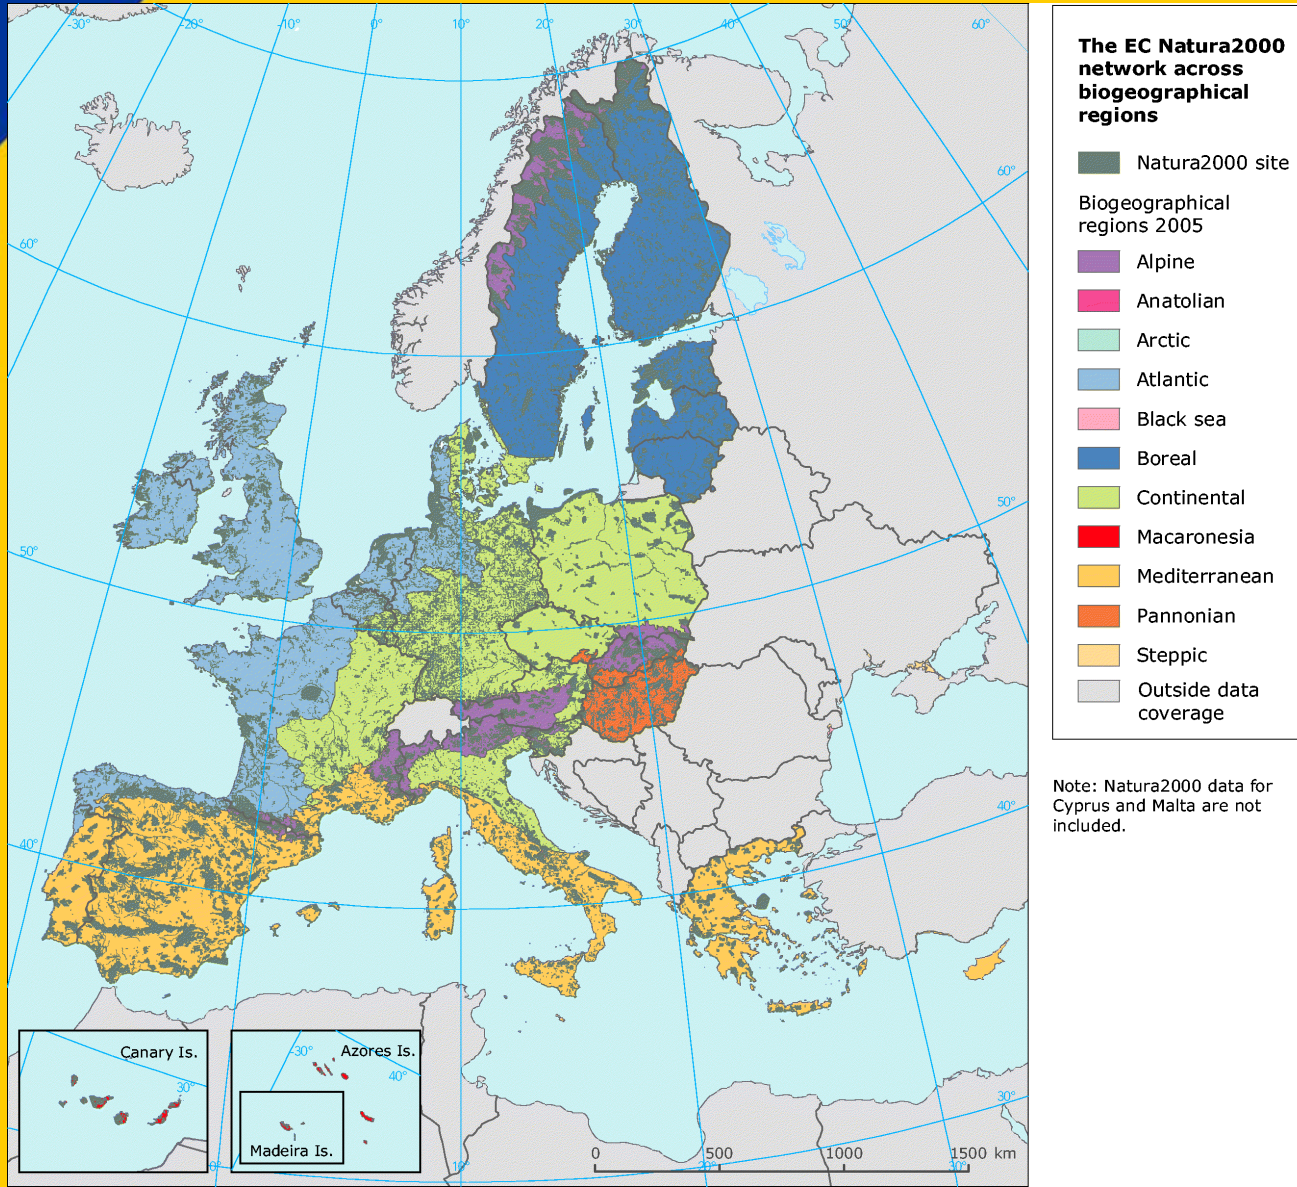

### Sustainable coastal engineering techniques

TITLE	Coastal interventions and Natura 2000 areas
WHY	Beaches to be protected sometimes belong or are close to a designated Natura 2000 site or other sensitive areas. That leads to conflicting interests.
WHAT	Find acceptable procedures for designing interventions in line with the Directives.
HOW	European wide co-operation in identification of best practices.
